TABLE ALPHABÉTIQUE DES MATIÈRES - SACHREGISTER INDICE ALFABETICO GENERALE - INDEX OF SUBJECTS

A = Generalia · B = Specialia · C = Studiorum progressus - Cogitationes - Studia nova

Confecit R. Jaeger, Mainz

Absorption intestinale de l'eau chez le lapin, *B* 690.
Acceleration response; the acceleration response of a primary muscle-spindle ending to ramp stretch of the extrafusal muscle, *B* 1026.
Acer platanoides L, v. Blattlipide.
2-Acetoxy-4-chlor-3,5-dijodbenzanilid, v. Fascioliasis.
Acetylation, v. Tryptophan metabolites.
Acetylcholine; effect of locally applied acetylcholine on the embryonic cardiac action potential, *B* 539.
Acetylcholine as an activator of oxidation reactions, *B* 432.
Acetylphenylhydrazine, v. Phosphatase.
Achatina fulica, v. *Orthomorpha sp.*
Achromobacter metalcaligenes, v. Protoporphyrin.
Acid-base equilibrium, v. Heart lung preparation.
Acid mucopolysaccharide, v. Urine concentrating process.
Acid phosphatase activity; the effect of basic vital dyes on the acid phosphatase activity of the granulated juxtaglomerular cells, *B* 422.
Acid-phosphatase, hypothalamic; effects of dehydration on rat's hypothalamic acid phosphatase, *B* 529.
Acide β-indolylacetique, v. 2,4-Dichlorophenol.
Acidosis, v. Erythrocytes.
Acridine mustard, v. Chromosomes.
Acridine orange, v. Nucleosides.
Acrylamide gels, v. α-L-Glycerophosphate dehydrogenase.
ACTH, v. C^{21} Steroids.
–, v. Hypertrophy, cardiac.
Actin aus Kalbsherzmuskel, *B* 106.
Actinomycin; Wirkung von Actinomycin auf das Enzym muster der Rattenniere während der Entwicklung, *B* 939
–, v. Tumour.
Actinomycin D; failure of actinomycin D to inhibit appearanc of clotting activity by vitamin K in vitro, *B* 421.
Active Transport; a new quantitative relation between interna and external steady-state concentrations in active transport *B* 712.
Adenine, v. Cytokinins.
–, v. Hypoxanthine.
Adenoma No. 1, v. Ibenzmethyzin hydrochloride.
Adenomata, v. Hypophyseal anterior lobe.
Adenosine derivatives, v. Cytokinins.
Adenovirus Type 12, v. Thymectomy.
Adipose tissue; inverse relationship between adipose tissu and skeletal muscle in the uptake of injected triglyceride fatty acid of chyle lipoproteins by diabetic rats, *B* 829.
–, v. Insulin.
Adrenal, v. C^{21} Steroids.
Adrenal gland, v. Chlorpromazine.

renal glands, v. Dopamine.
renal regeneration hypertension, v. Hypothalamic lesions.
rénaline, v. ARN induites.
renergic amines; cellular location of adrenergic amines in frog sympathetic ganglia, *B* 1052.
renergic blocking agent, v. Demethylimipramine.
renergic fibres; histochemical demonstration of adrenergic fibres in the smooth muscle layer of media of dorsal-pedal artery in dog, *B* 842.
renergic innervation of the male reproductive ducts in some mammals. II. Effects of vasectomy and castration, *B* 392.
renergic nerve endings in the feline cervical superius ganglion, *B* 477.
renergic nerves in the major salivary glands of the rabbit, *B* 924.
fel, v. n-Butylamin.
robic glycolysis of normal tissues suspended in thoracic duct lymph, *B* 63.
ferents, vagal visceral, v. Depolarization.
atoxin B_1; fungistatic action of aflatoxin B_1, *B* 187.
e, v. Immune response, primary.
e, v. Trehalose.
e factor; an age factor affecting variance of a behavioural character in F_1 hybrids between inbred lines of the house mouse, *B* 328.
robacterium tumefaciens; action de la capsicine sur la multiplication et la virulence de l'*Agrobacterium tumefaciens*, *B* 1076.
inesia; the influence of antidepressant drugs on akinesia produced in mice by intracisternally administered noradrenaline, dopamine and noradnamine, *B* 807.
izzia procera, v. Seeds.
caloid, v. β-Ergokryptine.
losterone pretreatment, v. Angiotensin.
llyloxy-phenoxy-propanolamine, eine neue Gruppe adrenergischer β Rezeptoren-Blocker, *B* 651.
minium salts, v. Carbohydrate metabolism.
ine; ein chemisch und pharmakologisch neuartiger Antagonist von pathophysiologisch bedeutsamen Aminen, Kininen und kininbildenden Faktoren, *B* 149.
ino acid hydrazides, v. Trifluoroacetyl.
ino acid incorporation by müllerian ducts isolated from chick embryos, *B* 544.
ino acid sequence, v. Peptides arginine containing.
ino acids, v. EMC Virus.
mino-butyric acid; effects of γ-amino-butyric acid on the potentials evoked in vitro in the superior colliculus, *B* 822.
minobutyric acid induced changes in the spontaneus firing rates of insect neurons, *B* 284.
minopenicillanic acid; photochemical transformations of 6-amino-penicillanic acid phenoxymethylpenicillin, *B* 280.
inotransferase; analysis of aminotransferase in liver and serum by gel filtration, *B* 528.
monium; the effect of ammonium ion upon ribonucleic acid polymerase and guanidine triphosphatase activity in isolated bovine endometrial nuclei, *B* 706.
oeba proteus, v. Contractile vacuole.
phibia, v. Protein.
ygdaloid nuclei; stereotaxic localization of amygdaloid nuclei in rats from weaning to adulthood, *B* 158.
mylase; a new method for the determination of α-amylase, *B* 805.
yloidosis; experimental amyloidosis and renal disease, *B* 561.
ylolytic enzymes in dog serum, *B* 373.
aphylactoid edema, v. Hypophysectomy.
drogensubstitution, v. Nebenhodengangepithel.
drostane series, v. Cortisol.
esthésie, v. Gastrotriches.
giotensin; pressor and oxitocic like effects of angiotensin affected by aldosterone pretreatment in guinea pigs, *B* 545.
renal and pressor actions of angiotensin in salt loaded and depleted rabbits, *B* 553.
the influence of the experimental conditions on the renal response to angiotensin in the rat, *B* 140.
v. Lidoflazine.
giotensin II; production of antibodies against synthetic angiotensin II in various animal species, *B* 952.
agonist, v. Amine.
thocyanins of *Dioscorea alata* L., *B* 611.
tibacterial agent; a new antibacterial agent (U 20,661) solated from a streptomycete strain, *B* 254.
–; a polypeptide antibacterial agent isolated from *Trichoderma viride*, *B* 85.
Antibacterial drugs; whole body sagittal technique in mice employing a new bio-autographic method: its utility for the evaluation of the body distribution of antibacterial drugs, *B* 310.
Antibodies, v. Angiotensin.
–, v. Insulin.
–, v. Lymphozytes.
Antibody, v. Antigens.
Antibody forming spleen cells, v. *Bordetella pertussis*.
Antibody production in bursectomized chickens treated with lipid and protein fractions from bursa, thymus and liver, *B* 1062.
Antidepressant drugs, v. Akinesia.
Antidiuretic action; effect of human serum oxytocinase on the antidiuretic action of lysine, vasopressin and oxytocin in the rat, *B* 196.
Antigen, v. Placenta.
Antigenic relationship between the cysts and trophozoites of *Entamoeba invadens*, *B* 1072.
Antigens; a qualitative difference between certain H-2 and non-H-2 antigens responsible for a similar graft-rejection rate, *B* 857.
–; secondary antibody responses of mice to bacterial somatic antigens, *B* 488.
–; separation of 'suluble' immunoprecipitating antigens originating from rabies virus infected cells by chromatography on ecteola cellulose and by gel filtration, *B* 872.
Antihistamine, v. Histamine.
Antilipolytic effects, v. 3,5-Dimethylisoxazole.
Anti-penicillin antibody; immunofluorescent technique to detect anti-penicillin antibody, *B* 77.
Antipolio action; structure activity relationships of compounds able to suppress the antipolio action of guanidine, *B* 1047.
Antithiamine factor, v. 3,4-Dihydroxycinnamic acid.
Antitumour activity, v. Fungi.
Aorta; acid glycosaminoglycans of pig aorta, *B* 344.
–, v. Oxidative phosphorylation.
Aortic cells, v. Atherosclerosis.
Aqueous humor, v. Clotting factors.
–, v. Pupillary flow.
Arachis hypogaea, v. Calcium-sodium interaction.
Arbacia lixula, v. DNA synthesis.
–, v. Vitellogenesi.
Argentaffin, cells; the distribution of argentaffin cells in the gastrointestinal tract of the sulfamerazine treated rat, *B* 825.
Arginine-vasopressin, v. Permeability of skin.
Argyrophilia, neuronal; neuronal argyrophilia in early degenerative states: a light and electron microscopic study of the Glees and Nauta techniques, *B* 237.
ARN induites; modification de métabolisme des ARN induites par l'adrenaline dans les cellules animales, *B* 365.
Aromatization; direct aromatization of C_{19}-steroid sulphates, *B* 97.
Arterial smooth muscle, v. Sympathetic regulation.
Arterial wall tension; intraluminal pressure and equivalent arterial wall tension, *B* 78.
Arthritis; suppression of adjuvant arthritis by estrone in adrenalectomized and ovariectomized rats, *B* 560.
Arylsulphatase C activity; autoradiographic demonstration of arylsulphatase C activity in peritoneal mast cells of the rat, *B* 940.
Arzneimittel, v. Lipoidlöslichkeit.
Ascites-Hepatom; zur Frage der genetischen Änderung eines Ascites-Hepatoms der Ratte durch Heterotransplantation auf chinesische Hamster, *B* 330.
Ascites mast cell cultures; the production of stabile steady states in mouse ascites mast cell cultures maintained in the chemostat, *B* 129.
Ascites-Tumorzellen; der Einfluss von 2-Deoxy-D-glucose auf die Substratoxydation in Ascites-Tumorzellen, *B* 803.
Ascorbic acid and testicular activity in heat exposed toad (*Bufo melanostictus*), *B* 667.
Asparaginsäure; über den Einbau von Asparaginsäure in peganin, *B* 812.
K-Aspartate, v. Metabolism cellular.
Aspergillus flavus, v. *Penicillium viridicatum*.
Astaxanthin in the blue oceanic barnacle *Lepas fascicularis*, *B* 12.
Asthma, bronchial; circulating plasma kinin in patients with bronchial asthma, *B* 626.

Atherosclerosis; effect of the mast cell disruptor BW 48/80 on dietary atherosclerosis in the male rabbit, *B* 68.
–; tritiated thymidine incorporation into aortic cells in vivo: Cell regeneration in spontaneous atherosclerosis in monkeys, *B* 732.
ATPase activity; relation of ATPase activities to iron uptake in rabbit and cat erythroid cells, *B* 627.
ATP-Spaltung; Untersuchungen über den Einfluss verschiedener Kationen auf die ATP-Spaltung durch die Zytoplasmafraktion vom *Plexus choroideus* des Rindes, *B* 105.
Atrium, v. Caffeine.
Attractant synthetic, v. *Choristoneura fumiferana.*
Autarky, cellular; genetic estimate of cellular autarky, *B* 584.
Autographic method, v. Antibacterial drugs.
Axolotl; an analysis of distal dominance in the regenerating limb of the axolotl, *B* 747.
Axon collaterals, v. Nerve cells.
Axon regeneration, v. Nucleolar changes.
7-Azaindole-3-acetamidoxime; antihypertensive activity of azaindole-3-acetamidoxime and indole-1-acetamidoxime, *B* 298.

Bacillus subtilis; photodynamic inactivation of some *Bacillus subtilis* bacteriophages, *B* 181.
Bacillus thuringiensis; the toxic action of *Bacillus thuringiensis* exotoxin on *Drosophila* reared in yeast containing and yeast free media, *B* 871.
Bacterial cells metabolism, v. D,L-Glyceraldehyde.
Bacteriophages, v. *Bacillus subtilis.*
Bacterium anitratum; strain-specific action of division-inhibiting agents in *Bacterium anitratum, B* 874.
Bacterium paracoli 5099; correlation between sensitivity to trypaflavine and DNA base composition in mutants of *Bacterium paracoli* 5099, *B* 765.
Balantidium coli, v. Lytic activity.
Balistes capriscus, v. Respiration.
Behaviour and random mating, *B* 585.
Benzene; chemical structure and biological activity of *o*-disubstituted derivatives of benzene, *B* 1038.
Benzilic acid; the molecular structure of the benzilic acid rearrangement product of 3α,17β-diacetoxy-11-hydroxy-12-oxo-5β-androst-9(11)-ene, *B* 612.
Benzimidazoles, v. Poliovirus replication.
3,4-Benzpyrene; electrophoretic study of the in vitro binding of 3,4-benzpyrene to the plasma proteins, *B* 661.
Benzylglucosinolate; the biosynthesis of the thioglucoside moiety of benzyl glucosinolate, *B* 174.
Bicarbonate secretion, v. Secretion.
Bile duct; does acute obstruction of the common bile duct produce distension of the rat bile tree, *B* 926.
Biliary epithelial cells; ciliated biliary epithelial cells in the livers of non-human primates, *B* 49.
Blattlipide; zur Kenntnis der Blattlipide von *Acer platanoides* L. während der herbstlichen Vergilbung, *B* 1004.
Bleivergiftung; autoradiographische Untersuchungen an direkten Kerneinschüssen im Nierenepithel der Ratte nach Bleivergiftung, *B* 558.
β-Blocking agents, v. Submaxillary gland.
Blood, v. Leucocytes.
Blood brain barrier damage and prolonged cerebral hyperemia following changes in cerebral perfusion pressure an experimental EEG study, *B* 929.
Blood cells; fluorescence of the blood cells of the *Tunicates Phallusia mammillata* and *Ciona intestinalis, B* 245.
Blood glucose, v. Electric currents.
Blood pressure, v. Cerebellum.
Blood serum, v. Riboflavin.
Blood vessels, v. Bradykinin.
Blutdruckreflex; zur Spezifität des durch Bradykinin Kallidin und Met-Kallidin ausgelösten Blutdruckreflexes an der Katze, *B* 29.
Bombyx mori, v. Sepiapterin deaminase.
Bone marrow shielding, Wound healing.
Bordetella pertussis; accelerated and prolongated multiplication of antibody forming spleen cells by *Bordetella pertussis* in mice immunized with sheep red blood cells, *B* 591.
Bradykinin; the effect of bradykinin on permeability of skin blood vessels, *B* 925.
–, v. Blutdruckreflex.
Brain, v. Perathiepine.
–, v. Sleep, paradoxical.
–, v. Trigeminal fibres.
Brain homogenate, v. Morphine.
Brain, human, v. Thalamus.
Brain stem, v. Chlorpromazine.
Brain tumors; quantitative changes in the phosphorus fra
tions of transplanted brain tumors during complete ischem
incubation, *B* 586.
5-Bromouracil and induced production of fusaric acid b
Fusarium oxysporum f. lycopersici in culture, *B* 441.
Brucea amarissima; constituants amers de *Brucea amarissim*
structures des brucéines A, B et C, *B* 424.
Brucéines A, B et C, v. *Brucea amarissima.*
Bufo melanostictus, v. Ascorbic acid.
Bulbocapnine; concerning the effect of bulbocapnine on th
caudate loop, *B* 1028.
Bulbocavernosus, v. RNA containing structures.
Bulbus olfactorius, v. Bursttätigkeit.
Bursttätigkeit; die postnatale Entwicklung der Bursttätig
keit im Bulbus olfactorius des Kaninchens, *B* 725.
Busycon canaliculatum, v. Cardiac muscle.
Butanol-xylene, v. Paraffin method.
n-Butylamin; Nachweis von *n*-Butylamin in Äpfeln, *B* 680.

C^{14} incorporation, v. Riboflavin.
Ca, v. Pinealectomy.
Ca^{++} Aufnahme; die Abhängigkeit der Ca^{++} Aufnahme is
lierter Mitochondrien des Herzmuskels von der Na^{+} un
K^{+}Konzentration als mögliche Ursache der inotrope
Digitaliswirkung, *B* 375.
Ca Haushalt, v. Prostaglandin E.
Caenorhabditis elegans, v. Nematodes.
Caerulein; isolation and structure of caerulein, an activ
decapeptide from the skin of *Hyla caerulea, B* 699.
–; pharmacological actions of caerulein, *B* 702.
–; synthesis of caerulein, *B* 700.
Caffeine; effect of caffeine on adenosine-induced heart bloc
in guinea pigs, *B* 648.
–; effects of caffeine on the contractility and membran
potentials of rat atrium, *B* 559.
Calciphylaxis, v. Phosphatase.
Calcium; effect of calcium and magnesium ions on the fr
quency of miniature end plate potential discharges i
amphibian muscle in the presence of ethyl alcohol, *B* 36
–, v. Thyrotropin release.
Calcium ions; presence of calcium ions as a requisite for th
in vitro stimulation of TSH-release by hypothalamic TR
B 853.
Calcium-sodium interaction in the pod development of th
peanut, *Arachis hypogaea* L., *B* 382.
Calciumreiche Ernährung, v. Radiostrontium-Ausscheidun
Candida, v. Isoenzymes.
Candida albicans; immunofluorescent and immunophoret
data on antigenic properties of *Candida albicans, B* 103
Candida lipolytica; loss of the ability to oxidize hydrocarbo
in protoplasts of *Candida lipolytica, B* 1005.
Capillary response; effect of imipramine on the norepinephrin
and histamine induced capillary response in the rat, *B* 21
Capsula interna fibres; conduction block in capsula intern
fibres caused by striatal spreading depression in rats, *B* 73
Captan, v. Thiols.
Carabus auronitens, v. Polymorphie.
Carbohydrate films; selectivity of carbohydrate films a
influenced by their moisture content, *B* 738.
Carbohydrate metabolism; the carbohydrate metabolis
accompanying intoxication by aluminium salts in the ra
B 912.
–; the effect of uremic serum on carbohydrate metabolism i
rat diaphragm, *B* 798.
Carbon dioxide production, v. Insulin.
Carbon tetrachloride, v. Colchicine.
Carboxypeptidase A, pancreatic; partial characterization
human pancreatic carboxypeptidase A, *B* 1007.
Carcinogenesis, v. Diethylnitrosamine.
Carcinosarcoma, mammary, v. Histamine.
Cardiac hypertrophy; ethanol inhibition of audiogenic stre
induced cardiac hypertrophy, *B* 734.
Cardiac muscle; isometric length-tension diagram for maxim
tetanic contractions of cardiac muscle from a gastrop
Busycon canaliculatum, B 772.
Cardiac necrosis; survival of stressed rats following expe
mental cardiac necrosis, *B* 138.
Cardium edule, v. Eye.
Carotenoids; disposition of carotenoids in the blue goo
barnacle *Lepas fascicularis,* B 965.
Caryophyllaceae, v. Test tube fertilization.
Castrated mice, v. Coat color.

tration; effect of castration and testosterone administration on the noradrenaline content of the vas deferens and the seminal vesicle of the guinea pig, *B* 816.
radiation induced castration in the female teleostean fish *Heteropneustes fossilis* Bloch, *B* 229.
v. RNA containing structures.
alase; catalysis and inhibition of the oxidative degradation of deoxyribonucleic acid by catalase showing maximum catalytic effect in pico-molar concentrations, *B* 91.
alytic waves, v. Serum albumin.
aracts, v. Heptachlor.
echolamines; cholinergic mechanism in the release of catecholamines from intra-ganglionic inhibitory terminals, *B* 948.
v. Central nervous system.
aggregation; analysis of a turbidimetric method for quantitatively estimating cell aggregation, *B* 693.
-division, v. Cytokinins.
ules germinales de l'ovaire, v. DNA.
tral nervous system; studies on the regional biosynthesis and metabolism of catecholamines in the central nervous system of the monkey, *B* 98.
v. Glutamic acid.
tromere area; observations on the centromere area of human chromosomes, *B* 1067.
atophrys, v. Karyological affinities.
copithecus, v. Genoma.
ebellum; monoamine pathways to the cerebellum and cerebral cortex, *B* 838.
he role of the cerebellum in blood pressure regulation, *B* 383.
ebral cortex, v. Cerebellum.
v. Ribonuclease inhibitor.
ebral ganglion, v. Neurosecretory cells.
vical ganglion, v. Adrenergic nerve endings.
vical nucleus, v. Nerve cells.
acea, v. Thalamus.
motaxis; studies on chemotaxis. VII. cytotaxins in rabbit serum, *B* 549.
nopodium rubrum, v. (2-Chloroethyl)trimethyl-ammonium chloride.
ck embryo, v. Ectoderm.
v. Citrate cleavage enzyme activity.
v. Follicle stimulating hormone.
v. Neural tube.
ck embryos, v. Amino acid incorporation.
v. Feathering, sex linked.
v. Lens regeneration.
oramphenicol; the effect of chloramphenicol analogs on protein biosynthesis in a cell-free *Escherichia coli* B system, *B* 427.
oramphenicol on the chick morphogenesis, *B* 901.
orella, v. Zinkaufnahme.
Chloroethyl)trimethyl-ammonium chloride; reversal of the inhibitory effect of (2-chloroethyl)trimethyl-ammonium chloride on the flowering of *Chenopodium rubrum*, *B* 861.
oroform, v. Halothan.
orophyll stability index, a suitable criterion for rapid screening of tree provenance in arid zones, *B* 37.
orophyll synthesis in tobacco callus interaction of sugar and kinetin, *B* 968.
oroplast galactolipids; marking of chloroplast galactolipids with tritium, *B* 983.
oroplasten; der Mangan- und Kupfergehalt von Chloroplasten und Cytoplasten, *B* 241.
orothiazide, v. Serotonin levels, intestinal.
orpromazine; the effect of chlorpromazine on the adrenal gland in rats with brain stem lesions, *B* 830.
v. Perathiepine.
lesterogenesis hepatic, v. Pyridinolcarbamate.
lesterol; dietary cholesterol and activity of enzymes hydrolysing and synthesizing cholesterol ester in pancreatic juice of rats, *B* 178.
lesteryl esters in flue-cured tobacco, *B* 987.
lin acetylase; secretory responses and cholin acetylase of the rats submaxillary gland after duct ligation, *B* 248.
linergic actions related to paradoxical sleep induction in the mesencephalic cat, *B* 1029.
ndriome, v. Néoglucogénèse.
ristoneura fumiferana; a synthetic attractant for the male spruce budworm moth *Choristoneura fumiferana*, *B* 377.
omatophores; Responses of crustacean larval chromatophores to light and endocrines, *B* 231.
Chromatophorotropins; a proposed uniform method of reporting response values for crustacean chromatophorotropins: the standard integrated response, *B* 962.
Chromosome levels, v. Gluten synthesis.
Chromosome preparations of *Opossum* leucocytes, *B* 671.
Chromosomensatz, v. *Nyctalus noctula*.
Chromosomen; Synchrone Replikation aller Chromosomen bei *Xenopus laevis*, *B* 40.
Chromosomes; accessory chromosomes in *Physalis ixocarpa*, *B* 862.
–; chromosomal rearrangements induced in *Drosophila* salivary gland chromosomes by an acridine half mustard, *B* 266.
–; the somatic chromosomes of 3 lizard species: *Gekko gecko*, *Iguana iguana*, and *Crotaphytus collaris*, *B* 769.
–, v. Genoma.
Chromosomes, human, v. Centromere area.
Chromosomes of some squirrels (mammalia-sciuridae) from the genera *Sciurus* and *Glaucomys*, *B* 249.
Chromosomes of the north american prairie dog *Cynomys ludovicianus*, *B* 51.
Chrysanthemum; a nullisomic plant in diploid *Chrysanthemum*, *B* 119.
Chrysene, v. Picene.
Cingalobolus bugnioni, v. Heart.
Ciona intestinalis, v. Blood cells.
Circadian period length; ranges of circadian period length, *B* 788.
Circadian rhythmicity of some key metabolites in the fasted and fed weanling female rat, *B* 634.
Cissampelos pareira, v. Roots.
Citrate cleavage enzyme activity; the citrate cleavage enzyme activity in chick embryo and chicken liver during development, *B* 1000.
Clarias batrachus, v. Nucleus lateralis tuberis.
Clotting activity, v. Actinomycin D.
Clotting factors of the primary aqueous humor of the rabbit's eye, *B* 471.
CNS, v. 5'HT content.
Co-factors, v. Nucleic acids.
$C^{14}O_2$ uptake, v. Tomatoes.
Coat 'color' difference between castrated and intact male mice, *B* 574.
Cobalt laurate; solubility of cobalt laurate in water and non-aqueous solvents, *B* 346.
Cobitis taenia L, v. Sex reversal.
Coccidiosis, intestinal, v. Mucosa.
Colchicine; comparative effects of carbon tetrachloride and colchicine on xanthine dehydrogenase, *B* 291.
Colchicine alkaloids; the presence of colchicine alkaloids in *Kreysigia multiflora* Reichb., *B* 273.
Cold shivering; reflex inhibition of cold shivering by pressure to the skin and the histological investigation of its afferent spinal pathway, *B* 453.
Collagen; studies on the structure of collagen. On the presence of α-keto acids in collagen, *B* 610.
–; studies on the structure of collagen V. The site of binding of trivalent iron on collagen, *B* 898.
–; studies on the structure of collagen IV. A C-terminal sequence from the pronase treated collagen, *B* 518.
–; the hexose content of the α-chains of bone collagen, *B* 22.
–; on the localization of tryptophane in the chain of collagen, *B* 986.
Collagen proteins in rat on long-term tyrosine diet, *B* 95.
Collateral vessels, v. Heart.
Colliculus, superior, v. γ-Amino-butyric acid.
Colour preference, v. Colour vision.
Colour vision and colour preference in the tropical eye-fly, *B* 818.
Conduction block, v. Capsula interna fibres.
Congressus, 80, 320, 504, 600, 696, 888, 1080.
Contractile vacuole; osmotic concentration of the vacuole of *Amoeba proteus* following UV light irradiation, *B* 120.
Contractility, v. Oxamate.
Contrast media; tissue toxicity of radiologic contrast media evaluated with *Tetrahymena pyriformis*, *B* 59.
Convulsive responses, v. Flurothyl.
Cooling, v. Shivering.
Corpus pineale, v. Tryptophanhydroxylase.
Corrigendum 696.
Cortical response; origin of the direct cortical response as studied in vitro in thin cortical sections, *B* 821.
^{3}H-Corticostesterone; the localization of ^{3}H-corticostesterone in mast cell granules by electron microscopic autoradiography, *B* 944.

–; elective localization of H^3-corticosterone in mast cells, *B* 267.
Cortisol; influence of epoxides of androstane series on some effects of cortisol, *B* 275.
–, v. Estradiol.
Corynebacterium minutissimum; the fine structure of *Corynebacterium minutissimum*, *B* 345.
Countercurrent exchange; extravascular short-circuiting of oxygen indicating countercurrent exchange in the intestinal villi of the cat, *B* 197.
Coxsackie group a virus infection, v. LDH isozyme pattern.
Coxsackie virus, v. Myocarditis.
Creativity; a heuristic model of creativity, *B* 150.
Crest explants, v. Light sensitivity.
Crotalus durissus terrificus, v. Phospholipase A.
Crotaphytus collaris, v. Chromosomes.
Crustacean muscle axo-axonal synapse, v. Presynaptic inhibition.
Cryostat sections, v. Succinic dehydrogenase.
Cu_2-Komplexe, v. RNS.
Cyclooctatetraen; über Addukte aus Cyclooctatetraen und Schwefeldichlorid, *B* 896.
Cynomys ludovicianus, v. Chromosomes.
Cysts, v. Antigenic relationship.
^{3}H-Cytidin-Phenylalinin, v. Poliferations-Stoffwechsel.
Cytokinins; phosphorylated derivatives of the cytokinins zeatin and its 9-β-D-ribofuranoside, naturally occurring adenine and adenosine derivatives with plant cell-division promoting activity, *B* 515.
Cytophilic antibodies; heterogeneity of macrophage cytophilic antibodies in immunized mice, *B* 490.
Cytoplasten, v. Chloroplasten.
Cytosine arabinoside, v. Development.
Cytostatic agents; influence of fibrinolytic and proteolytic enzymes and on phagocytosis of guinea-pigs leucocytes, *B* 813.
Cytotaxins, v. Chemotaxis.

Deformities, embryonic, v. 3-Methylcholanthren.
Dehydration, inert; investigation of the N and P losses in different media used for inert dehydration, *B* 279.
Dehydroascorbic acid reductase factor in guinea pig tissues, *B* 362.
Dehydroepiandrosteron, v. 7α-Hydroxylation.
7-α-^{3}H-Dehydroepiandrosteron-^{35}S-sulphate, v. Ovarian tissue.
Dehydrogenase, v. Phenazine methosulfate.
Dehydrogenases, ovarian; the effect of steroid treatment on ovarian dehydrogenases in the rat, histochemical study, *B* 909.
Dehydromunduserone; a new synthesis of dehydromunduserone, *B* 613.
Demethylimipramine (Desipramine), an adrenergic blocking agent, *B* 252.
Dendrocoelum lacteum O. F. Müller; experimental studies on embryonic development of *Dendrocoelum lacteum*, *B* 212.
Denervation and reinnervation of the rat's submaxillary gland, *B* 730.
Denervation, hypogastric; effect of chronic hypogastric denervation on the noradrenaline content of the vas deferens and accessory male reproductive glands of the rat, *B* 817.
2-Deoxy-D-glucose, v. Ascites-Tumorzellen.
Depigmentation, ischemic, *B* 524.
Depolarization; primary afferent depolarization produced by vagal visceral afferents, *B* 117.
Desipramin; Retinale Impulsaktivität und Elektroretinogramm unter dem Einfluss von Desipramin, *B* 728.
Desynchronized sleep, v. Hypotension.
Development; delay of normal development of sea urchin embryos by cytosine arabinoside, *B* 136.
Diabetic rats, v. Adipose tissue.
3α,17β-Diacetoxy-11-hydroxy-12-oxo-5β-androst-9(11)-ene, v. Benzilic acid.
Diaphragm, v. Carbohydrate metabolism.
–, v. Insulin.
2,4-Dichlorophenol; interaction du 2,4-dichlorophenol et de l'eau oxygénée dans la destruction enzymatique de l'acide β-indolylacétique, *B* 180.
Dickenmessungen; Direkte Dickenmessungen an Muskelstreifenpräparaten und Gewebsschnitten, *B* 240.
Didelphis azarae, v. Sleep.
Diethylnitrosamine; carcinogenesis in different animal species by diethylnitrosamine, *B* 497.
Diethylstilbestrol, v. Estrogen syndrome.
Diets, v. Spontaneous activity.
Digitaliskörper, v. Herzglykoside.
Digitaliswirkung, v. Ca^{++} Aufnahme.
Dihydroménaquinone, v. Tritium.
3,4-Dihydroxycinnamic acid, an antithiamine factor of fern *B* 996.
2,4-Dihydroxy-3,5,6-trimethylbenzoic acid; isolation an structure of 2,4-dihydroxy-3,5,6-trimethylbenzoic acid fron *Mortierella ramanniana*, *B* 703.
Diketopiperazines from fermentations: metabolites, artifacts or both, *B* 796.
3,4-Dimethoxyphenylethylamine, v. Dopamine metabolism
Dimethyl sulfoxide; radioprotective effects of dimethyl sul foxide vapor on mice, *B* 923.
–; ultrastructural changes in the stratum corneum after pro fuse swabbing of the skin with dimethyl sulfoxid, *B* 616
3,5-Dimethylisoxazole; the antilipolytic effects of 3,5-dime thylisoxazole and possible carboxylic acid metabolites *B* 905.
Dimethylphenylpiperazin, v. Tyramin.
1,5-Dimorpholino-3-(1-naphtyl)-pentane; anti-arrythmic pro perties of 1,5-dimorpholino-3-(1-naphtyl)-pentane: D. 1686, *B* 243.
Dioscorea alata, v. Anthocyanins.
N,N-Diphenyl-p-phenylene diamine (DPPD), v. 3-Methyl cholanthren.
Diphenylpropylamine derivative; potentiation of sympatheti effects by a new diphenylpropylamine derivative, *B* 336
Diphteria toxin; phospholipid alterations in liver and serum of rabbits treated with diphteria toxin, *B* 233.
–, v. Mitochondrial swelling.
Discoglossus pictus, v. Regeneration.
Dispersing cells, v. Pronase.
Disputandum, 686.
Distal twinning; on the mechanism of distal twinning of th chick embryo limb bud, *B* 773.
Diuretic 'clopamide' (DT 327), v. Insulin release.
Diuretic compound; a new type of non-kaliuretic diureti compound, *B* 513.
DMSO; an effect of DMSO on post irradiation sacchari avoidance in mice, *B* 276.
DNA; la synthèse du DNA dans les cellules germinales d l'ovaire de poulet pendant la dernière semaine de la vi embryonnaire, *B* 419.
–; on the interaction between basic telopeptides and DNA *B* 723.
–, v. *Bacterium paracoli* 5099.
–, v. Light.
–; reduction in DNA and RNA content during the develop ment of haploid *Rana pipiens* embryos, *B* 1075.
DNA replication; the mode of timing of DNA replicatio and of mitosis in cultured animal cells, *B* 913.
DNA synthesis; about the DNA-synthesis during the earl development of *Paracentrotus lividus*, *Arbacia lixula* an their hybrids, *B* 777.
DNS, v. RNS.
DNS synthese der Neuroglia im experimentellen Hirnöden *B* 941.
D_2O; influence of heavy water (D_2O) on the multiplication o adeno and mengo virus, *B* 786.
DOPA; the effect of high phenylalanine concentration on th formation of DOPA from phenylalanine and tyrosine b tyrosine hydroxylase, *B* 532.
DOPA in ocular pigment cells in mammalian albinotic embryo *B* 441.
Dopamine; resting secretion of dopamine from the adren glands of the cat in vivo, *B* 919.
–, v. Sex hormones.
Dopamine metabolism; effect of 3,4-dimethoxyphenylethyla mine injections upon dopamine metabolism in rats an dogs, *B* 536.
Dorsal roots, v. Regeneration.
Drosophila, v. *Bacillus thuringiensis*.
–, v. Chromosomes.
–; the exploitation of genetic heterogeneity among th founders of laboratory populations of *Drosophila* prior t directional selection, *B* 1066.
Drosophila egg, v. Magnetic fields.
Drosophila melanogaster; genetics and activity in *Drosophi melanogaster*, *B* 330.
–, v. 4-Hydroxypyrazolo(3,4 d)pyrimidine.
–, v. Eye pigments.
–, v. Nucleic acid.
–, v. Teratogenesis.

sophila *pseudoobscura;* variability within and between strains for mating behaviour parameters in *Drosophila pseudoobscura*, *B* 131.
sophyllum *lusitanicum* Link; cultivation of embryos of *Drosophyllum lusitanicum* an insectivorous plant, *B* 675.
strophic mice, v. Glutamic acid.

lyson als Begleitsubstanz des Ecdysterons in *Polypodium vulgare* L., *B* 995.
lysteron, v. Ecdyson.
inococcus *granulosus;* isolation of two antigenic fractions from hydatic fluid of *Echinococcus granulosus*, *B* 757.
inoderms, v. Quinone pigments.
oderm; time required for heterogenous induction in chick embryo ectoderm, *B* 869.
TA; the enhancing effect of EDTA on the antibacterial activity of nalidixic acid against *Pseudomonas aeruginosa*, *B* 1043.
G; das hypoxiebedingte EEG-Arousalstadium unter dem Einfluss von Pentobarbital und Urethan, *B* 217.
G-activity; relationships between reserpine induced phasic EEG-activity and single unit discharge in the pontine reticular formation and lateral geniculate body neurons, *B* 389.
G study, v. Blood brain barrier.
g white of chicken; an immunologically detectable change in the egg white of chicken eggs following pre-incubation storage, *B* 567.
rlich ascites tumor, v. Photoinactivation.
rlich ascites tumour, v. RNA synthesis.
ctric currents; the effect of transcranial application of electric currents on free fatty acid and blood glucose levels, *B* 146.
ktrisches Organ, v. Entladungsfrequenz.
ctrolytic output, v. Gastric secretion.
ctron impact studies IV. expulsion of methylen under electron impact, *B* 609.
ctron microscopy, v. Staining technique.
ctrophoresis, v. α-L-Glycerophosphate dehydrogenase.
ctroretinographic response, v. Test flash interaction.
bryonic cardiac action potential, v. Acetylcholine.
bryonic cells, v. Histones.
bryonic induction, v. Leucine.
bryos, v. Development.
v. Phosphomonoesters.
C Virus; inhibition of EMC virus reproduction and prevention of cell death by amino acids analogues and puromycin, *B* 83.
pty vesicles; significance of empty vesicles in postganglionic sympathetic nerve terminals, *B* 123.
cephalopathy; severe alterations in myelin structure in experimental lymphogenous encephalopathy, *B* 835.
d-Plate potential, v. Magnesium.
docrines, v. Chromatophores.
doplasmic reticulum, v. Nuclear membrane.
dothel; Besonderheiten im Feinbau des Endothels der Rattenpfortader, *B* 791.
dotoxin; the effect of endotoxin on the lactic acid production in pregnant and nonpregnant rats, *B* 470.
dotoxin, bacterial; the influence of bacterial endotoxin on the formation of antibody-forming spleen cells in mice immunized with sheep red blood cells, *B* 849.
amoeba invadens, v. Antigenic relationship.
ladungsfrequenz; Änderungen der Entladungsfrequenzen des elektrischen Organs bei verschiedenen Verhaltensweisen eines Nilhechtes (*Gnathonemus petersii*), *B* 868.
dermal cells, v. Thymidine.
physektomie, v. Farbwechsel.
taxy; oriented overgrowth (epitaxy) of macromolecular organic compounds, *B* 409.
thelial cells, v. Ferritin.
thelial lining of the intestine, v. Ionizing radiation.
oxide-formation; studies on the possibility of epoxide-formation from disubstituted hexitols, *B* 512.
rgokryptine, a new alkaloid of the ergotoxine group, *B* 991.
egungsübertragung von Riesenfasern auf Motoneurone bei der Schabe *Periplaneta americana* L, *B* 38.
thacus rubecula, v. Zugvögel.
throcytes; on the question of the mechanism of inhibitory effect of acidosis on anaerobic glycolysis of erythrocytes, *B* 618.
r. Membrane enzymes.
r. Potassium permeability.

Erythropoiesis; mechanism of decreased erythropoiesis in thyroidectomized rats, *B* 1063.
Erythropoietin; effect of hypothalamic lesions on erythropoietin production in weanling and adult rats, *B* 668.
–; the effect of central nervous system stimulation on plasma erythropoietin levels in rhesus monkeys, *B* 577.
Escherichia coli B system, v. Chloramphenicol.
Escherichia coli K12, v. Tryptophan.
Estradiol; effects of estradiol and cortisol on neural tissue in culture, *B* 467.
Estradioldipropionat; aktivierende Wirkung von Luzerne-Extrakten auf die Aktivität von Estradioldipropionat, *B* 1023.
Estrogen syndrome; early estrogen syndrome in the rat by the non-steroidal estrogen diethylstilbestrol, *B* 374.
Estrone, v. Arthritis.
Ethacrynic acid hyperglycaemia in mice, *B* 1039.
Ethanol inhibition, v. Cardiac hypertrophy.
Ethyl alcohol, v. Magnesium.
Ethyl-methansulfonate, v. Mutagenesis.
Ethylene glycol; ultrasonification of ethylene glycol, *B* 177.
Etonitazene; effects of etonitazene upon respiratory neurons, *B* 57.
Exotoxin, v. *Bacillus thuringiensis*.
Experimentis, pro –, 74, 157, 235, 310, 404, 596, 690, 790, 883, 981, 1078.
Eye-fly, v. Colour vision.
Eye of *Cardium edule:* anatomical and physiological investigation, *B* 677.
Eye pigments; abnormalities of the eye pigments (pteridins and ommochromes) induced in *Drosophila melanogaster* by the inhibitor of xanthine dehydrogenase 4-hydroxypyrazolo (3,4 d) pyridine, *B* 1020.
–, v. 4-Hydroxypyrazolo(3,4 d)pyrimidine.

Farbwechsel; über den Farbwechsel von *Rana esculenta* nach Epiphysektomie, *B* 967.
Fascioliasis; a new compound effective against acute fascioliasis in sheep, *B* 992.
Fasting, v. 7α-Hydroxylation.
Fatty acid, v. Electric currents.
Fatty acid composition, v. Lipid peroxidation.
Fatty acids, v. Hibernation.
^{59}Fe, v. Huminsäuren.
Feathering, sex linked; hormone dependency of sex linked feathering of female hybrid chick embryos (Cross New Hampshire ♂ Light Sussex ♀, *B* 46.
Fern, v. 3,4-Dihydroxycinnamic acid.
Ferritin; the passage of ferritin into jejunal epithelial cells, *B* 370.
Fertility; hyperbaric oxygen and testicular damage and fertility, *B* 302.
γ-Fibres, v. Succinylcholine.
Fibrinolysis, v. Polysorbate 80.
–, v. β-Lipoproteins.
Fibrinolytic proteases, v. Snake venoms.
Fibrinolytic system in the dog with experimental renal (Goldblatt) hypertension, *B* 224.
Fish, v. Intraperitoneal injections.
Flatfishes, v. Swimming activity.
Flies, v. Hairs, chemosensitive.
Fluorapatite; IR-spectra of fluorapatite and fluorchlorapatite, *B* 10.
Fluorchlorapatite, v. Fluorapatite.
Fluorescence; a simple method for reduction of non specific fluorescence, *B* 317.
Fluorescence emission, v. Nucleosides.
Flurothyl; pharmacogenetic factor in the convulsive responses of mice to flurothyl, *B* 214.
Food intake, v. γ-Irradiation.
Food water intake, v. Selenium.
Follicle stimulating activity; a rapid, sensitive method for the determination of follicle stimulating activity, *B* 1078.
Follicle-stimulating hormone; the effects of follicle-stimulating hormone on the uptake of labelled glycine by the chick embryo, *B* 969.
Folpet, v. Thiols.
(^{3}H) Formate incorporation into liver nucleic acids of chick, relationships between orotic acid and vitamin B_{12}, *B* 521.
Formatio reticularis; Verhalten von Hippocampus-Pyramidenzellen bei retikulärer Reizung, *B* 190.
Frictional ratio, v. Viscosity, instrinsic.
Frog, v. Retinal rod.
Fungi; on the antitumour activity of some products of wood-decaying fungi, *B* 1056.

Furocoumarins, v. Photoinactivation.
Fusaric acid, v. 5-Bromouracil.
Fusarium oxysporum lycopersici, v. 5-Bromouracil.
Fusimotor activation, v. Muscle spindle endings.
Fusimotor effects on position and velocity sensitivity of muscle spindles, *B* 205.

Galactolipids, v. Chloroplast galactolipids.
Gallus domesticus, v. Steroid hormones.
Ganglienschädigung, v. *Herpes suis*.
Ganglienzelle, v. Zwischenhirn.
Gasserian cells; relationship of gasserian cells to extraocular muscle proprioception in lambs, *B* 230.
Gasterosteus aculeatus, v. X-ray cinematography.
Gastric mucosa, v. Pyridine nucleotide.
Gastric secretion; dose response of gastric secretion and electrolyte output in pylorus ligated rats to insulin hypoglycemia, *B* 300.
Gastrocnemius-soleus nerves; presynaptic inhibition by gastrocnemius soleus nerves, *B* 550.
Gastropod ventricle, v. Heart.
Gastrotriches; effects de quelques anesthésiques sur les gastrotriches, *B* 1025.
Gaumenspalten, v. 1 Phenyl-3,3-dimethyl-triazen.
Gekko gecko, v. Chromosomes.
Gene regulation, v. Tumour formation.
Generationszeiten; zur statistischen Verteilung von Generationszeiten, *B* 843.
Genetic control, v. Potassium, blood.
Geniculate body neurons, v. EEG-activity.
Genoma; statistical analysis of the relation between the length of the genoma and the diploid number of the chromosomes in *Cercopithecus*, *B* 672.
Geschmacksknospe; Licht- und elektronenmikroskopische Befunde an den Geschmacksknospen der Axolotlzunge, *B* 657.
Gestagens, v. Pregnancy.
Giant neurons, v. Urethan.
Giant cells in the gonads of the indian desert gerbil, *Meriones hurrianae*, Jerdon, on exposure to internal irradiation, *B* 381.
Gibberellic acid; response of *Pisum sativum* Linn. to gibberellic acid, *B* 45.
Gibberelline; Versuche zum enzymatischen Abbau der «gebundenen» Gibberelline von *Pharbitis purpurea*, *B* 415.
Gibberellins; comparative potency of gibberellins in inducing parthenocarpic fruit growth in *Malus sylvestris* Mill., *B* 865.
Glands reproductive, v. Denervation hypogastric.
Glaucomys, v. Chromosomes.
Glees techniques, v. Argyrophilia.
0,5 Sγ_2-Globulin; isolation of a 0,5 Sγ_2-globulin from normal Human plasma, *B* 520.
Gluconyl peptides; physiological activities of gluconyl peptides, *B* 1024.
Glucose; the distribution of glucose and methylglucose between the liver and plasma in normal and insulin injected rats, *B* 219.
Glucose release; endogenous glucose release stimulated by oral sucrose administration in rats, *B* 1009.
Glucuronic acid excretion, v. γ-Irradiation.
-D-Glucuronidase; the histochemical demonstration of β-D-Glucuronidase in the reticuloendothelial system, *B* 954.
Glutamic acid; estimation of free glutamic acid in the differentiating central nervous system of the chick, *B* 740.
Glutamic acid dehydrogenase activity in muscles of dystrophic mice, *B* 629.
Glutamic-aspartic transaminase, v. Temperature.
α-N-alkyl-Glutamine derivatives, v. Tumours.
Glutathione, v. Phosphatase.
Gluten synthesis; the control of wheat gluten synthesis at the genome and chromosome levels, *B* 332.
D,L-Glyceraldehyde; effect of D,L-glyceraldehyde on bacterial cells metabolism, *B* 437.
Glycerol, v. Hibernation.
α-L-Glyerophosphate dehydrogenase; electrophoresis of mitochondrial α-L-glycerophosphate dehydrogenase on acrylamide gels, *B* 597.
Glycine, v. Follicle stimulating hormone.
Glycogen content, v. Sleep, paradoxical.
–, v. Insulin.
Glycogen fractions, cardiac; cardiac glycogen fractions in the ventricles of fasted and non-fasted exercised rats, *B* 473.
Glycogen α-4-glucosyltransferase, v. Uridinediphosphoglucose.
Glycogène lipides, v. Protéines musculaire.
Glycolysis, anaerobíc, v. Erythrocytes.
Glycoprotéines, v. Polymorphisme.
Glycosaminoglycan, v. Aorta.
Glycoside effect upon membrane enzymes of erythrocytes an
muscle in duck myopathy, *B* 522.
Golden hamsters; spermiogenesis in hibernating golden ham
sters, *B* 844.
Goldfish, v. Sodium intake.
Gonadenentwicklung; über die Gonadenentwicklung des Sta
(*Sturnus vulgaris*) in Abhängigkeit von seinem Zugverhalte
B 963.
Gonades; transplantations interspécifiques de gonades en
bryonnaires de *Phasianidés*, *B* 761.
Gonadotrophin; the influence of chorionic gonadotrophin o
the reduced NADP-DCPIP oxidoreductase system of r
testis, *B* 552.
Gonadotropin stimulating factor; bioassay of hypothalam
gonadotropin stimulating factor, *B* 304.
Graft-rejection rate, v. Antigens.
Gramicidin S, v. Structure-activity relation.
Gramine; a metabolic pathway of gramine in barley, *B* 77
Granulocytes; variation of the fine structure in granulocyt
of great apes, *B* 669.
Gray bodies; Beziehungen zwischen phagozytierenden virus
infizierten Myeloblasten des Huhnes in vitro und de
«gray bodies», *B* 876.
Growth, v. heat production.
–, v. *Mycobacteria*.
Growth inhibition, v. Thermal stress.
Growth rates, v. Maternal aggressiveness.
Growth response of nodule bacteria to phytohemogglutani
B 784.
Guanidine, v. Antipolio action.
Guanidine triphosphatase, v. Ammonium.
Bis-Guanylhydrazone; a new bis-guanylhydrazone with ant
leukemic properties, *B* 173.

Haarwurzel, v. Sexchromatinbestimmung.
Habrobracon juglandis, v. Tryptophan metabolism.
Hämin, v. Protoporphyrin.
Haemobartonellae; ultrastructural common properties
Haemobartonellae and *Mycoplasmatales*, *B* 572.
Hairs, chemosensitive; fine structure of the tip of chemose
sitive hairs in two blow flies and the stable fly, *B* 780.
Halothan; der Einfluss von Halothan und Chloroform auf di
Feinstruktur und Proteinsynthese der Rattenleber, *B* 65
Hamster, v. Ascites Hepatom.
–, v. Lymph node metastases.
–, v. Thymectomy.
Harn, v. Laktatdehydrogenase-Aktivität.
Haut, v. Plattenepithelkarzinom.
Hayatidin, v. Roots.
Healing, v. Wounds.
Heart; contractility cycle of an isolated gastropod ventricl
B 570.
–; physiology of the heart of *Cingalocolus bugnioni* (Diplo
poda Myriapoda), *B* 388.
–; protection effect of polyhydroxyl compounds on hea
lysosomal structures, *B* 247.
–; tangential wall stress as a molding force in the developmen
of collateral vessels in the canine heart, *B* 595.
–, v. Histamine.
–, v. Pentose phosphate pathway.
–, v. Muscle, frog.
Heart block, v. Caffeine.
Heart cell, v. Mitochondrial swelling.
Heart changes, v. Isoproterenol.
Heart lung preparation; acid-base equilibrium in the hea
lung preparation, *B* 314.
Heat, v. Substance Q.
Heat production of the albino mouse during growth, *B* 54
Hefezellen; Fehlermöglichkeiten bei der Bestimmung vo
Metabolitgehalten in Hefezellen, *B* 623.
Hemoglobin, mouse, chain composition multiple electr
phoretic bands, *B* 763.
Hepatic circulation; entero hepatic circulation of 7α-^{3}H-DHE
35S-sulfate, 7α-3H-DHEA-^{14}C glucuronoside and free 7
^{3}H-DHEA in the human, *B* 480.
Hepatitis-infectiosa-Virus, v. Succinodehydrase-Aktivität.
Heptachlor; on reproduction studies and the occurrence
cataracts in rats after long-term feeding of the insecticid
heptachlor, *B* 42.

erpes suis; zur primären Schädigung vegetativer Ganglien nach Infektion mit dem *Herpes-suis*-Virus bei verschiedenen Tierarten, *B* 209.
erz, v. Ca^{++}-Aufnahme.
v. Prostaglandin E.
v. Tyramin.
erzglykoside; über die amindepletierende Wirkung verschiedener Digitaliskörper, ein Beitrag zur Aufklärung des Wirkungsmechanismus der Herzglykoside, *B* 475.
erzmuskel, v. Actin.
erznerv; der Ursprung des dorsalen Herznervs der *Lithobiiden*, *B* 452.
eterochromatization in opossum, *A* 889.
eterogenous induction, v. Ectoderm.
eteropneustes fossilis, v. Castration.
v. Ionizing radiation.
eterotransplantation, v. Ascites Hepatom.
exitol, v. Epoxide-formation.
exose content, v. Collagen.
ibernation; the content of non-esterified fatty acids and glycerol in the blood of the hedgehog during the hibernation period, *B* 457.
v. Golden hamsters.
irudinaria granulosa, v. Neurosecretory cells.
ippocampal afterdischarge; influence of side position on hippocampal afterdischarge (HAD) in the rabbit, *B* 478.
ippocampus-Pyramidenzellen, v. Formatio reticularis.
irnödem, v. DNS-Synthese.
istamine; effect of histamine on sinoatrial node cells of rabbit heart, *B* 66.
the inhibitory effect of histamine on mast cell damage induced by antihistamines, *B* 834.
the waking action of histamine, *B* 21.
istamine; formation in rats bearing the walker mammary carcinosarcoma, *B* 152.
istones; effects of histones on embryonic cells, *B* 26.
$_2O_2$-Zerfall, v. RNS.
omoprotocatechuic acid, v. 4-Methylcatechol.
ouse mouse, v. Age factor.
HT content; effects of β-internal (P^{32}) irradiation on the 5-HT content of CNS levels, *B* 526.
uminsäuren; autoradiographischer Nachweis von Huminsäuren mit ^{59}Fe, *B* 519.
unger cry signals; the ability of human mothers to identify the hunger cry signals of their own new-born infants during the lying-in period, *B* 768.
ydatic fluid, v. *Echinococcus granulosus*.
ydrocarbon oxidation, v. *Candida lipolytica*.
ydrocortison; radioprotective effect of hydrocortison and prednisolon on the *Vicia faba equina*, *B* 1045.
ydrogen peroxide; possible effect of radiation produced hydrogen peroxide on post-irradiation aversion in mice, *B* 749.
ydrolysis, v. Phosphomonoesters.
ydrolytic activity, v. Muscle acyl phosphatase.
Hydroxydopamine(3,4,5-trihydroxy-phenyl-ethylamine); electronmicroscopic localization of 5-hydroxy-dopamine (3,4,5-trihydroxy-phenyl-ethylamine) a new 'false' sympathetic transmitter, *B* 743.
-Hydroxylation; the effect of thyroid application and fasting on 7α-hydroxylation of dehydroepiandrosterone in rat liver in vitro, *B* 663.
Hydroxy-3-methylglutaric acid; hypocholesterolemic effect of 3-hydroxy-3-methylglutaric acid, *B* 380.
Hydroxypyrazolo(3,4-d)pyrimidine; effects of the inhibitor of xanthine dehydrogenase, 4-hydroxypyrazolo(3,4-d)pyrimidine on the red eye pigments of *Drosophila melanogaster*, *B* 186.
Hydroxytryptamine, v. Reserpine.
yla caerulea, v. Caerulein.
yperemia, cerebral, v. Blood brain barrier.
yperaemia, renal; the role of renal hyperaemia and plasma oncotic pressure in proximal tubular reabsorption in the rat, *B* 799.
yperbaric oxygen; potentiation of the immunosuppressive effects of cytoxan by hyperbaric oxygen, *B* 758.
ypercapnia; influence of hypercapnia on the noradrenalin content of sympathetically decentralized and innervated skeletal muscle, *B* 394.
yperglycaemia, v. Ethacrynic acid.
ypertension, v. Nucleic acids.
ypertension, renal, v. Fibrinolytic system.
ypertrophy, cardiac; failure of cortisone and ACTH to regulate cardiac hypertrophy, *B* 1061.
Hypoglycaemic effect, v. Insulin.
Hypophyseal anterior lobe; spontaneous adenomata of the hypophyseal anterior lobe aged pinealectomized rats, *B* 129.
Hypophysectomy; action of hypophysectomy and plasma transfusion on anaphylactoid edema, *B* 1035.
–; rapid transmandibular hypophysectomy of small fish, *B* 1079.
Hypophysektomie, v. Nebenhodengangepithel.
Hypotension; two different hemodynamic patterns underlying hypotension during desynchronized sleep, *B* 1021.
Hypothalamic hormones; solubility of the hypothalamic hormones TSH-releasing factor (TRF) and LH-releasing factor (LRF) in organic and alcoholic solvents, *B* 417.
Hypothalamic lesions; effect of hypothalamic lesions on MSH content of the intermediate lobe of the pituitary gland in the rat, *B* 759.
–; effect of ventromedial hypothalamic lesions on development of adrenal regeneration hypertension in weanling female rats, *B* 1031.
–, v. Erythropoetin.
Hypothalamus, v. Sex hormones.
–, v. Ventricular injections.
Hypothermia; responses of the oculomotor units to the labyrinth stimulation under hypothermia, *B* 823.
Hypothyroid rats, v. Pyridoxal phosphate.
Hypoxanthine; on the interaction of hypoxanthine with adenine, *B* 36.

Ibenzmethyzin hydrochlorid; the activity of ibenzmethyzin hydrochloride against the human transplantable tumours, human epithelioma No. 3 and human adenoma No. 1, *B* 234.
Iguana, iguana, v. Chromosomes.
Ileum, v. Secretion.
Imipramine, v. Capillary response.
–, v. Reserpine.
Immune destruction, v. Lymphopoietic system.
Immune response, primary; age dependency of the primary immune response in the hereditary pituitary dwarf and normal snell-bagg mouse, *B* 1059.
Immunoelectrophoresis; methods for increasing sensitivity in immunoelectrophoresis, *B* 502.
γ-Immunoglobulin, v. Lupoid cirrhosis.
Immunosuppressive effects, v. Hyperbaric oxygen.
Indigogenic reaction; the indigogenic reaction for demonstration of alkaline and acid phosphatase, *B* 183.
Indole-1-acetamidoxime, v. 7-Azaindole-3-acetamidoxime.
Indole derivatives; fluorescence of indole derivatives, *B* 906.
Indolglucosinolate; Untersuchungen zur Verbreitung von Indolglucosimolaten in höheren Pflanzen: *Moringa oleifera* Lam, *B* 103.
Indolyl-3-acetaldehyd-Mutase; zur Frage der Indolyl-3-acetaldehyd-Mutase in Mikroorganismen, *B* 101.
Indolyl-3-acetic acid; autoradiographic evidence of tritiated indolyl-3-acetic acid in epicotyl tissue of *Phaseolus coccineus*, *B* 387.
Induction neurogène chez les oiseaux: passage du flux inducteur par le filtre millipore, *B* 461.
Inhibitory terminals, v. Catecholamines.
Inositol; étude de la repartition de l'inositol dans le cortex et le noyau de cristallin de veau, *B* 202.
Insulin; action of insulin on the glycogen content of liver and muscle of the murrel (*Ophicephalus striatus*, Bloch), *B* 641.
–; effect of insulin on carbon dioxide production in adipose tissue from immature rats, *B* 72.
–; enhanced hypoglycaemic effect of exogenous insulin associated with an increased response of adipose tissue and a diminished response of the diaphragm in 'meal fed' rats, *B* 468.
; evidence for the precipitating activity of insulin antibodies, *B* 951.
–; Untersuchungen über den Einfluss von überschüssigem Zink auf die Aggregation von nativem und photooxydiertem Insulin, *B* 435.
–, v. Glucose.
–, v. Pancreatic cells.
Insulin hypoglycemia, v. Gastric secretion.
Insulin release; the effects of a substituted sulphamoyl diuretic 'clopamide' (DT 327) on insulin release in vitro, *B* 132.
Interferon; recovery and idendification of interferon in the rabbit urine, *B* 309.
–; the implication of the temperature independent binding and the temperature dependent action of interferon, *B* 1073.

Intestinal absorptive cells, v. Mitochondrial morphology.
Intestinal epithelium, v. Migration cell.
Intestinal villi, v. Countercurrent exchange.
Intestine, v. Methionine transfer.
–, v. Tadpoles.
Intraperitoneal injections; reliability of intraperitoneal injections in fish, *B* 883.
Invagination; la chronologie d'invagination chez le poulet: étude à l'aide de la thymidine tritiée, *B* 576.
Iodotyrosines; release of labelled iodotyrosines in the thyroid vein of dog, *B* 809.
Ionizing radiation; pattern of cell damage due to ionizing radiation in the epithelial lining of the intestine in *Heteropneustes fossilis* Bloch, *B* 358.
Iron, v. Collagen.
Iron uptake, v. ATPase activity.
Irradiation; effect of irradiation on the properties of pollen in austrian and scotch pines, *B* 296.
–; whole-body γ-irradiation, food intake and glucuronic acid excretion in rats, *B* 903.
–; v. *Penicillium viridicatum*.
Islets of langerhans, v. D-Mannoheptulose.
Isoenzymes of some oxido-reductases in the *Candida* genus as a basis of species identification after electrophoresis, *B* 961.
Isolation, v. Maternal aggressiveness.
Isoproterenol; correlation between functional and morphological heart changes due to isoproterenol, *B* 112.
Isotope scanning of subdural effusions in infancy, *B* 831.

Juxtaglomerular cells, v. Acid phosphatase activity.

Kaliumtyrodelösung, v. Zwerchfell.
Kallidinin, v. Blutdruckreflex.
Kallus, v. Kinetin.
Karyological affinities; the close karyological affinities between a *Ceratophrys* and *Pelobates*, *B* 1071.
α-Keto acids, v. Collagen.
Kidney; increased pressor responsiveness to kidney extracts, *B* 746.
–; monoaminergic innervation of the kidney. Aorticorenal ganglion-a sympathetic, monoaminergic ganglion supplying the renal vessels, *B* 109.
–, v. Succinic dehydrogenase.
Kinetin; Untersuchungen über die Wirkung von Kinetin auf Kallus und Tumoren bei Organkulturen von *Nicotinia glauca*, *N. langsdorffii* und deren amphidiploiden Bastard, *B* 367.
–, v. Chlorophyll synthesis.
–, v. *Lemna minor*.
Kinin, v. Amine.
–, v. Asthma.
Kinins, v. β-Ray irradiation.
Klebsiella-Antigene; zur Immunchemie der *Klebsiella*-Antigene, *B* 907.
Knorpel, v. Progesteron.
Krebs-2-cells, v. Polyribosome patterns.
Kreysigia multiflora, v. Colchicine alkaloids.
Kupfer, v. Chloroplasten.

Laboratory populations, v. Drosophila.
Labyrinth stimulation, v. Hypothermia.
Lacerta sicula, v. Steroid hormones.
Lactate dehydrogenase virus, v. Thymectomy.
Lactic acid, v. Endotoxin.
Lactic acid dehydrogenase, v. Lupoid cirrhosis.
Lactic dehydrogenase isoenzymes in various cell types of mouse liver, *B* 800.
Laktatdehydrogenase-Aktivität; experimentelle Untersuchungen zur Steigerung der Laktatdehydrogenase-Aktivität des Harnes, *B* 833.
LANE-EMDEN equation; on the physical validity of the LANE-EMDEN equation in (y; z)-plane, *B* 697.
Larval epiderm; experiments of in vitro cultures of larval epiderm of desert locust (*Schistocerca gregaria* Forsk), *B* 64.
LDH isozyme pattern in induced muscle disease (coxsackie group A virus infection), *B* 581.
Lead uranyl acetate, v. Stainung technique.
Lead tetraacetate oxidation, v. B-Norsteroid.
Leber, v. O_2-Umsatz.
–, v. Proliferations-Stoffwechsel.
Lemna minor; die Veränderung des Stärke-, Protein-, und RNS-Gehaltes von *Lemna minor* L. unter dem Einfluss von Kinetin (6-Furfurylaminopurin), *B* 621.
–, v. Stoffwechseluntersuchungen.
Lens, bovine; occurrence of ribose phosphate isomerase bovine lens, *B* 189.
Lens regeneration; a contribution to the study of lens regen ation capacity in chick embryos, *B* 970.
Lepas fascicularis, v. Astaxanthin.
–, v. Carotenoids.
Leucine; an autoradiographic study of the uptake of 3 leucine during primary embryonic induction in vitro, *B* 8
–; teratogenic effects of the amino acid leucine in the chicke *B* 767.
Leucine H^3; autoradiographic study on incorporation of leuci H3 in peripheral nerves during regeneration, *B* 33.
Leucocyte granules, v. Mast cell.
Leucocyte lysosomes; v. Oxygen, hyperbaric.
Leucocyte phospholipids, v. Snake venoms.
Leucocytes; a simple method for the collection of leucocyt from rat blood, *B* 885.
–, v. Chromosome preparations.
–, v. Cytostatic agents.
–, v. Ribonuclease activity.
L-Leucyl-β-napthylamide hydrolyzing enzyme, v. Snake v noms.
Levator ani; persistence of the levator ani muscle in fema rats, *B* 852.
LH-releasing factor, v. Hypothalamic hormones.
Licht-Dunkel-Wechsel, v. O_2-Umsatz.
Lidoflazine; effect of lidoflazine on norepinephrine, angi tensin and serotonin responses in isolated smooth musc preparations, *B* 647.
Light; effects of light on the translocation of bacterial DN in *Solanum lycopersicum* esc, *B* 864.
–, v. Chromotophores.
Light sensitivity of melanophores in neural crest explant *B* 155.
Limb bud, v. Distal twinning.
Lipid fractions, v. Antibody production.
Lipid peroxidation; longevity, hepatic lipid peroxidation ar hepatic fatty acid composition of mice fed saturated unsaturated fat-supplemented diets, *B* 1003.
Lipids, v. Lymph.
Lipoidlöslichkeit; zur «Lipoidlöslichkeit» von Arzneimittel *B* 938.
Lipoiodol ultrafluid (Guerbet), v. Lymphography.
Lipophilic complexone, v. Metal transport.
β-Lipoproteins; investigations on the relation between β-lip proteins and plasma euglobulin fibrinolysis, *B* 274.
Lithium ions; the effect of lithium ions on the post tetan potentiation of neuro-muscular transmission, *B* 255.
Lithobiiden, v. Herznerv.
Liver, v. Succinic dehydrogenase.
Liver, embryonic, v. sRNA methalase.
Liver, v. Aminotransferase.
–, v. Citrate cleavage enzyme activity.
–, v. Glucose.
, v. Insulin.
, v. Lactic dehydrogenase isoenzymes.
–, v. Lipid peroxidation.
–, v. Pentobarbital.
–, v. Pyridoxal phosphate.
–, v. $^{89}Sr^{++}$.
–, v. Tryptophan pyrrolase.
Liver cells; the preparation of metabolically active suspe sions of mouse liver cells, *B* 596.
Liver glycogen, v. Riboflavin.
Livers, v. Biliary epithelial cells.
Lupoid cirrhosis with serum lactic acid dehydrogenase linke to an γA immunoglobulin, *B* 593.
Luteoskyrin, v. RNA synthesis.
Luzerne, v. Samenbläschen.
Luzerne Extrakte, v. Estradioldipropionat.
Lymph; the lipids of human peripheral lymph, *B* 355.
Lymph node metastases; experimental model for the indu tion of tumoral lymph node metastases in hamsters, *B* 75
Lymphatic organs, v. Pinealectomy.
Lymphoid tissues, v. Thymus.
Lymphocyte culture; study of the lymphocyte fractions the mixed lymphocyte culture in vitro, *B* 848.
Lymphocytes; adherence of opsonized lymphocytes to macr phage cultures, *B* 347.
–; effect of penicillin on ribonucleic acid synthesis in lymph cytes of sensitized individuals, *B* 840.
–; studies on human lymphocytes stimulated in vitro wi anti-γ and anti-μ antibodies, *B* 271.

nphography; experimental lymphography by means of a ubarachnoidal injection of lipiodol ultrafluid (Guerbet), 3 455.
nphopoietic system; a histochemical study of immune estruction of the lymphopoietic system, *B* 1012.
in, v. Antidiuretic action.
ic activity; the lytic activity of immune and non-immune abbit serum on *Balantidium coli*, *B* 874.

romolecular organic compounds, v. Epitaxy.
rophage cultures, v. Lymphocytes.
rophage reaction; specificity of the macrophage reaction n vitro, *B* 496.
gnesium, v. Calcium.
gnesium ions, v. Novobiocin.
gnesium pemoline, v. X-Irradiation.
gnetic fields; lack of effect of constant magnetic fields on *Drosophila* egg hatching time, *B* 814.
aria infection; exotoxin in malaria infection (*Plasmodium erghei*), *B* 14.
ate dehydrogenase isoenzymes in the pancreatic islets of obese-hyperglycemic mice, *B* 709.
lus sylvestris, v. Gibberellins.
gan, v. Chloroplasten.
Iannoheptulose; the effect of d-mannoheptulose on islets f langerhans cultured in vitro, *B* 379.
ek's disease, v. Mast cells.
t cell; histochemical comparison of mast cell globule eucocyte granules in the rat, *B* 655.
t cell disruptor BW 48/80, v. Atherosclerosis.
t cell granules, v. ^{3}H-Corticostesterone.
t cells, v. Arylsulphatase C activity.
igh frequency of mast cells in spleens of A-strain mice, 3 194.
nitotic activity of mast cells in precancerous mouse skin, 3 460.
eparation of mast cells from the peritoneal fluid of the at with a GE nucleopore filter, *B* 407.
. H^3-Corticosterone.
t cell damage, v. Histamine.
t cells in nerves affected with fowl paralysis (Marek's isease), *B* 836.
t cells, neoplastic; atypic chronology of the mitotic cycle f neoplastic mouse mast cells, *B* 916.
ernal aggressiveness; effects of isolation on maternal ggressiveness and body growth rates of offspring, *B* 782.
ing, random, v. Behaviour.
ing behaviour, v. *Drosophila pseudoobscura*.
ia, v. Adrenergic fibres.
andrium album, v. Test tube fertilization.
anocytes, v. Skin, human.
anophores, v. Light sensitivity.
brane enzymes, v. Glycoside effect.
brane potentials, v. Caffeine.
curascan-203; Geschwindigkeit der selektiven Akkumuation von Mercurascan-203 im geschädigten Muskel und n ischämischen Myokard, *B* 649.
iones hurrianae Jerdon, v. Giant cells.
rifield method, v. Pentapeptide.
ncephalic cat, v. Cholinergic actions.
nephroi, v. Phosphomonoesters.
nephros; the biphasic course of regression in the chick esonephros, *B* 307.
abolism cellular; effect of K and Mg aspartate on cellular etabolism, *B* 424.
abolitgehalt, v. Hefezellen.
l transport; acceleration of metal transport in yeast cells reated with a lipophilic complexone, *B* 1014.
ionine transfer across goldfish intestine acclimatized to ifferent temperatures, *B* 548.
opholine; plasma levels and renal excretion of unchanged ethopholine in man, *B* 934.
thylcatechol, a metabolite of homoprotocatechuic acid, 493.
thylcholanthrene-induced embryonic deformities in the ick: prevention by the antioxidant, N,N′-diphenyl p-henylene diamine (DPPD), *B* 589.
thyl-DOPA, v. α-Methyl-norepinephrine.
yl-glucose, v. Glucose.
ylen, v. Electron impact.
Methylen-19-nor-17-α -acetoxy-progesterone, *B* 794.
yl-norepinephrine; ón the norepinephrine replacement by -methyl-norepinephrine in the rat heart after treatment ith α-methyl-DOPA, *B* 810.
1-(5-Methyl-1-phenyl-4-pyrazolyl)-3-(4-(o-tolyl)-piperazinyl)-1-propanone, a new synthetic antihypertensive agent, *B* 514.
Methylpsoralen, v. Photosensitizing activity.
Met-Kallidin, v. Blutdruckreflex.
Mg-aspartate, v. Metabolism cellular.
Microbial flora, v. Tadpoles.
Microcultures; method for obtaining several microcultures in the same petri dish, *B* 887.
Microcytosis; the effect of microcytosis on red cell constituents, *B* 631.
Micturition behaviour of neonatally testosterone treated female dogs, *B* 921.
Migration cell; comparison of the cell cycle and cell migration in the intestinal epithelium of suckling and adult mice, *B* 1050.
Mitochondria, v. Sarcosine dehydrogenase.
–, v. Transplantation.
Mitochondrial morphology; atypical mitochondrial morphology of the intestinal absorptive cells of the germfree rat, *B* 494.
Mitochondrial swelling; effect of some substances on the mitochondrial swelling induced by diphtheria toxin in chicken embryo heart cell cultures, *B* 742.
–; experiments on mitochondrial swelling in vivo, *B* 752.
Mitochondrien, v. Ca^{++}-Aufnahme.
Mitosis, v. DNA replication.
Mitotic cycle, v. Mast cells, neoplastic.
Mitotic irregularities, v. Proliferation.
Mittelfrequenz-Reizung; das apolaritäre Prinzip der Mittelfrequenz-Reizung, *A* 601.
Monoamine pathways, v. Cerebellum.
Monoaminergic innervation of the pulmonary vessels in various laboratory animals (rat, rabbit, cat), *B* 114.
Monoaminergic innervation, v. Kidney.
Monoamineoxydase; réactivation des solutions de monoamine-oxydase inactivées par dialyse, *B* 797.
–, v. Tetrazolium.
Mondlicht, v. Zugvögel.
Monkey, v. Central nervous system.
Moringa oleifera, v. Indolglucosinolate.
Morphine; transfer of induced tolerance to morphine and promazine by brain homogenate, *B* 278.
Morphogenesis, v. Chloramphenicol.
Mortierella ramanniana, v. 2,4-Dihydroxy-3,5,6-trimethyl-benzoic acid.
Motor endplate; histochemical nature of the motor endplate, *B* 660.
MSH content, v. Hypothalamic lesions.
Mucopolysaccharide excretion, v. Urine.
Mucosa; changes in permeability of the mucosa during intestinal coccidiosis infections in the fowl, *B* 972.
Müllerian ducts, v. Amino acid incorporation.
Murein; chromatographic evidence for murein from the bacteroid symbiotes of *Periplaneta americana* (L), *B* 499.
Muribasidiospora indica; proliferating basidia in *Muribasidiospora indica*, *B* 866.
Mus (*Leggada*) *bufo* Th; cytogénétique des leggada (1) la formule chromosomique de *Mus* (*Leggada*) *bufo* Th. (2) nouvelles données sur la délétion portant sur le bras court d'un X chez *Mus* (*Leggada*) *triton* Th, *B* 133.
Mus (*Leggada*) *triton* Th, v. *Mus* (*Leggada*) *bufo* Th.
Musca domestica, v. Trehalose.
Muscle acyl phosphatase; hydrolytic activity of muscle acyl phosphatase on 3-phosphoglyceryl phosphate, *B* 1019.
Muscle, frog; contraction of frog stomach muscle and frog heart in electrolyte free solutions, *B* 996.
Muscle, v. Insulin.
Muscle length, v. Muscle spindle endings.
Muscle proprioception, v. Gasserian cells.
Muscle-spindle ending, v. Acceleration response.
Muscle spindle endings; responses of primary muscle spindle endings at constant or changing muscle length to variations in fusimotor activation, *B* 396.
Muscle spindles, v. Fusimotor effects.
Mutagenesis, v. Teratogenesis.
Mutagenesis with ethyl methanesulfonate in *Nigella damascena*, *B* 673.
Mycobacteria; quantitative fluorimetric assay of the effect of a mycobacterial culture filtrate on the early growth of *mycobacteria* in vitro, *B* 692.
Mycobacterium phlei, v. Tritium.
Mycoplasmatales, v. Haemobartonellae.
Myelin structure, v. Encephalopathy.
Myelin ultrastructure; electron microscopical aspects of myelin ultrastructure, *B* 462.

Myeloblasten, v. Gray bodies.
Myenteric plexus; neurone number in the myenteric plexus in new born and adult rats, *B* 52.
Myocardial hypertrophy, v. Pentose phosphate pathway.
Myocardial infarction, v. Serum.
Myocarditis; coxsackie virus valvulitis and myocarditis observed at routine autopsy, *B* 1041.
Myokard, v. Mercurascan-203.
Myometrium, human, v. Uridinediphosphoglucose.
Myopathy, v. Glycoside effect.
Mystus vittatus, v. TSH-content.

N-loss, v. Dehydration, inert.
Nachtaktivität, v. Zugvögel.
NADP-DCPIP oxidoreductase, v. Gonadotrophin.
Nalidixic acid, v. EDTA.
Natulan, v. Procarbazin.
Nauta-Laidlaw preparations; improved impregnation of degenerating boutons in Nauta-Laidlaw preparations, *B* 338.
Nauta techniques, v. Argyrophilia.
Nebenhodengangepithel; das Nebenhodengangepithel der Ratte nach Hypophysektomie und nach Androgensubstitution, *B* 61.
Nématodes, libres; genetique et évolution des nématodes libres. Perspectives tirées de l'étude de *Caenorhabditis elegans*, *A* 161.
Néoglucogénèse; le chondriome des hépatocytes en culture trypsinée au cours de la néoglucogénèse. Comportement de la glucose-6-phosphatase, *B* 364.
Nephrectomy, v. Succinic dehydrogenase.
Nerve cells; initial axon collaterals from nerve cells in the lateral cervical nucleus, *B* 871.
Nerve cord ventral, v. Neurosecretory cells.
Nerves, v. Leucine H^3.
–, v. Mast cells.
–, Trigeminal fibres.
Nerves, adrenergic, cardiac, v. Segontin.
Neural tissue, v. Estradiol.
Neural tube; experimental production of chick embryo neural tube opening in vitro, *B* 458.
Neuro-muscular transmission, v. Lithium ions.
Neurones, v. Myenteric plexus.
Neurons, v. Olfactory bulbs.
–, v. Nucleolar changes.
Neurons-FUDR, v. *Vicia faba*.
Neurons, insect, v. γ-Aminobutyric acid.
Neurosecretory cells in the ventral nerve cord of leech (*Hirudinaria granulosa*), *B* 1055.
Neurosecretory cells; studies on the neurosecretory cells in the cerebral ganglion of *Potamon magnum magnum* (Pretzman), *B* 564.
Neurosekretorische Zellen; enzymhistochemische Untersuchungen an durstaktivierten neurosekretorischen Zellen der Ratte, *B* 943.
Neurospora crassa, v. Nuclear division.
Nicotiana glauca, v. Kinetin.
Nicotiana langsdorffii, v. Kinetin.
Niere, v. Actinomycin.
Nierenepithel, v. Bleivergiftung.
Nigella damascena L., v. Mutagenesis.
Nilhecht, v. Entladungsfrequenz.
N-Nitroso-Verbindungen, v. Tabakrauch.
Noradrenalin, v. Hypercapnia.
–, v. Sex hormones.
Noradenalin-Freisetzung, v. Tyramin.
Noradrenaline, v. Castration.
Norepinephrine, v. Lidoflazine.
–, v. α-Methyl-norepinephrine.
B-Norsteroid; the mechanism of the lead tetraacetate oxidation of a B-norsteroid, *B* 686.
Novobiocin and the binding of magnesium ions, *B* 244.
Nuclear division in *Neurospora crassa* during conidiation and germination, *B* 192.
Nuclear membrane; role of the nuclear membrane in smooth endoplasmic reticulum formation in white rat pinealocytes, *B* 465.
Nucleic acid content of a diploid and of a triploid strain of *Drosophila melanogaster*, *B* 269.
Nucleic acids; antihypertensive effect of co-factors of the synthesis and precursors of nucleic acids in experimental hypertension, *B* 546.
–, v. (^{3}H) Formate.
Nucleolar changes in spinal ganglion neurons during the course of axon regeneration, *B* 256.
Nucleosides; enhancement of fluorescence emission of acridi orange by nucleosides, *B* 614.
Nucleus lateralis tuberis; the nucleus lateralis tuberis in t fresh water teleost, *Clarias batrachus* Linn., *B* 760.
Nyctalus noctula; la formule chromosomique de la noctu *Nyctalus noctula* Schreiber (mammalia chiroptera), *B* 9

O_2-Umsatz; Einfluss des Licht-Dunkel-Wechsels auf den Umsatz der Rattenleber, *B* 23.
Ocular pigment cells, v. DOPA.
Oiseaux, v. Induction neurogène.
Olfactory bulbs; response of single neurons in the olfact bulbs of rabbits, dogs and cats to X-rays, *B* 137.
Ommochromes, v. Eye pigments.
Ophicephalus striatus, v. Insulin.
Ophryotrocha puerilis, v. Sex balance.
Opossum, v. Chromosome preparations.
–, v. Heterochromatization.
Orientation; non-visual orientation in *Talitrus saltator*, *B*
Orientierungsversuche; eine Dressurmethode für wahrn mungsphysiologische Untersuchungen und ihre Anwendu in Orientierungsversuchen mit Vögeln, *B* 312.
Orotic acid, v. (^{3}H) Formate.
Orthomorpha sp.; a new predatory millipede on *Achatina ful* in Andamans, *B* 776.
Oryzias latipes, v. Sex.
Oscillation, v. Pupil servomechanism.
Osmotic concentration, v. Contractile vacuole.
Ovarian tissue; direct metabolism of 7-α-^{3}H-dehydroste 35S-sulphate in human ovarian tissue, *B* 851.
Oxamate; the effect of oxamate on the contractility of isola rat atria, *B* 144.
Oxidation reactions, v. Acetylcholine.
Oxidative degradation, v. Catalase.
Oxidative phosphorylation of guinea pig aorta, *B* 16.
Oxido-reductases, v. Isoenzymes.
Oxosteroids, v. Zimmermann reaction.
Oxygen, hyperbaric; effect of hyperbaric oxygen on leucoc lysosomes, *B* 980.
Oxytocin, v. Antidiuretic action.
Oxytocin-Analoga, v. Peptidsynthesen.
Oxytocinase, v. Antidiuretic action.

P-loss, v. Dehydration, inert.
Pancreatic cells; morphological characteristics of the secret granules in pancreatic cells from species with identi primary structures of insulin, *B* 721.
Pancreatic islets, v. Malate dehydrogenase.
Pancreatic juice, v. Cholesterol.
Pancytopenia; failure of L-phenylalanine to prevent benze induced pancytopenia, *B* 481.
Paracentrotus lividus, v. DNA synthesis.
Paradoxical sleep, v. Cholinergic actions.
Paraffin method; use of mixure of ethanol-*n* butanolxyl in paraffin method, *B* 790.
Parthenocarpic fruit growth, v. Gibberellins.
Peganin, v. Asparaginsäure.
Pelobates, v. Karyological affinities.
Penicillin, v. Lymphocytes.
Penicillium brevi compactum, v. Pilzzellen.
Penicillium cyclopium, v. Pilzzellen.
Penicillium islandicum Sopp, v. RNA synthesis.
Penicillium viridicatum; in vitro susceptibility of strains *Penicillium viridicatum* and *Aspergillus flavus* to β-i diation, *B* 492.
Pentachlorophenyl esters, v. Peptides.
Pentapeptide; synthesis of a pentapeptide by the merrif method, *B* 406.
Pentobarbital, v. EEG.
Pentobarbital detoxification by the regenerated liver partially hepatectomized rats, *B* 70.
Pentose phosphate pathway; the role of the pentose phosph pathway in adjustment of the heart to a high load the development of myocardial hypertrophy, *B* 530.
Peptide synthesis; stereoselectivity in peptide synthesis u simple conditions, *B* 177.
Peptides; further applications of pentachlorophenyl ac esters in the synthesis of peptides, *B* 253.
Peptides, arginine containing; mass spectrometric determ tion of the amino acid sequence in arginine contai peptides, *B* 428.
Peptidsynthesen; über Peptidsynthesen XLIII. Darstell einiger Oxytocin-Analoga, *B* 620.

thiepine; the influence of perathiepine and chlorpromazine
n some enzyme reactions in rat brain preparations, *B* 90.
blaneta americana L, v. Erregungsübertragung.
Murein.
toneal fluid, v. Mast cells.
neability, v. Mucosa.
neability of skin; similar effects of arginine-vasopressin
nd arginine-vastotocin on permeability of toad skin, *B* 220.
xydase activity, v. Respiration rates.
tader, v. Endothel.
gocytosis, v. Cytostatic agents.
lusia mammillata, v. Blood cells.
bitis purpurea, v. Gibberelline.
seolus coccineus, v. Indolyl-3-acetic acid.
seolus vulgaris, v. Respiration rates.
sianidés, v. Gonades.
nazine methosulfate; the effect of phenazine methosulfate
n the activity of dehydrogenase as studied by starch gel
ectrophoresis, *B* 35.
noxymethylpenicillin, v. 6-Aminopenicillanic acid.
enylalanine, v. Pancytopenia.
enyl-3,3-dimethyl-triazen; teratogene Wirkung von 1-Phe-
yl-3,3-dimethyl-triazen, Erzeugung von Gaumenspalten
ei BD-Ratten, *B* 1042.
enicurus phoenicurus, v. Zugvögel.
sphatase; differential effect of oxidized glutathione or
cetylphenylhydrazine on individual electrophoretic com-
onents of red cell acid phosphatases, *B* 107.
ne role of pyrophosphate and alkaline phosphatase in skin
alcification (calciphylaxis), *B* 295.
Indigogenic reaction.
sphatase activity; acid phosphatase activity in cyto-
lasmic bodies of the absorbing intestinal cells from suckling
igs, *B* 339.
osphoglyceryl phosphate, v. Muscle acyl phosphatase.
spholipase A; chromatographic separation of phospholi-
ase A from a histamine releasing component of brazilian
attlesnake venom (*Crotalus durissus terrificus*), *B* 741.
spholipid alterations, v. Diphteria toxin.
sphomonoesters; some aspects of the hydrolysis of phos-
homonoesters by homogenates of growing and regressing
esonephroi in chick embryos, *B* 801.
sphorus fraction, v. Brain tumors.
toinactivation of Ehrlich ascites tumor cells in vitro ob-
ained with skin-photosensitizing furocoumarins, *B* 335.
toperiods, v. TSH-content.
tosensitizing activity; skin-photosensitizing activity of
ome methylpsoralens, *B* 985.
salis ixocarpa, v. Chromosomes.
sarum polycephalum, v. Transplantation.
tohemogglutanin, v. Growth response.
ne; organic minerals, picene and chrysene as constituents
f the mineral curtisite (idrialite), *B* 793.
, suckling, v. Phosphatase activity.
zellen; Feinstruktur von Pilzzellen. 1. Septen bei *Penicil-
um brevi-compactum*, *B* 445.
einstruktur von Pilzzellen. II. Endogene Konidienbildung
ei *Penicillium cyclopium*, *B* 786.
alectomized rat, v. Hypophyseal anterior lobe.
alectomy; the effect of pinealectomy on the Ca and SO_4
urnover of the lymphatic organs, *B* 148.
alocytes, v. Nuclear membrane.
s, v. Irradiation.
m sativum, v. Gibberellic acid.
itary, v. Immune response, primary.
TSH-content.
itary gland, v. Hypothalamic lesions.
Thymus.
enta; persistence of a growth hormone-like antigen in
rgan cultures of human placentas, *B* 846.
ma, v. Glucose.
β-Lipoproteins.
ma, human, v. 0,5 S γ_2-Globulin.
ma lipids, v. Substance Q.
ma oncotic pressure, v. Hyperaemia, renal.
ma proteins, v. 3,4-Benzpyrene.
ma transfusion, v. Hypophysectomy.
modium berghei, v. Malaria infection.
elets, blood, v. Reserpine.
elets, bovine; ultrastructure of a microorganism associated
ith bovine platelets, *B* 111.
tenepithelkarzinom; interzelluläre Verbindungen beim
lattenepithelkarzinom der menschlichen Haut in der
ewebekultur, *B* 946.
Plexus chorioideus, v. ATP-Spaltung.
Pluchea lanceolata L., v. Pluchine.
Pluchine; chemical investigation of *Pluchea lanceolata* L. isolation of a new quaternary base, pluchine, *B* 989.
Poliovirus replication; new 1,2-disubstituted benzimidazoles with high inhibiting effects on poliovirus replication, *B* 704.
Pollen, v. Irradiation.
Polycrystal lattice parameters; contribution to the X-ray diffraction methods for precision determinations of polycrystal lattice parameters, *B* 349.
Polyhydroxyl compounds, v. Heart.
Polymorphie eines Chromosoms innerhalb von Populationen des Laufkäfers *Carabus auronitens* Fabr., *B* 257.
Polymorphisme des lipoprotéines et des glycoprotéines sériques chez la truite, *B* 955.
Polynucleotidases in animal tissues, *B* 321.
Polypodium vulgare L., v. Ecdyson.
Polyriboadenylic acid (poly A), v. Polyribouridylic acid.
Polyribosome patterns in EMC-virus infected krebs-2 cells and cell extracts, *B* 1010.
Polyribouridylic acid (poly U); the low temperature reaction of poly U and poly A, *B* 208.
Polysorbate 80; enhancement of fibrinolysis and thrombolysis by polysorbate 80 (tween 80), *B* 261.
Postsynaptic potentials; interneuronal barrages and ripple superposed on inhibitory postsynaptic potentials, *B* 727.
Potamon magnum magnum, v. Neurosecretory cells.
Potassium, v. Thyrotropin release.
–, v. Water intake.
Potassium, blood; evidence of genetic control of blood potassium type in the marwari breed of sheep in India, *B* 273.
Potassium permeability; studies on potassium permeability changes in human erythrocytes, *B* 19.
Precancerous mouse skin, v. Mast cells.
Precipitating activity, v. Insulin.
Pregnancy; maintenance of pregnancy in spayed female rats by gestagens of 6-dehydro-16-methylene-17α-acetoxyprogesterone type, *B* 664.
Pressor responsiveness, v. Kidney.
Pressure, v. Arterial wall tension.
Presynaptic inhibition in crustacean muscle: axo-axonal synapse, *B* 1036.
Presynaptic inhibition, v. Gastrocnemius-soleus nerves.
Primates, v. Biliary epithelial cells.
Procarbazin; Untersuchungen über den Wirkungsmechanismus von Procarbazin (Natulan), *B* 222.
Progesteron; die Wirkung von Progesteron und Progesteronmetaboliten auf das Wachstum von embryonalem Knorpel in vitro, *B* 716.
Progressus, studiorum – 155, 400, 499, 683, 879, 974.
Proliferation; the occurrence of mitotic irregularities during a normal epithelial proliferation, *B* 841.
Proliferations-Stoffwechsel; zum Proliferations-Stoffwechsel der Rattenleber nach Teilhepatektomie. Autoradiographische Untersuchungen mit ^{3}H-Cytidin, -Phenylalanin und -Thymidin, *B* 718.
Promazine; v. Morphine.
Pronase; the use of pronase for dispersing cells, *B* 572.
Pronase treated collagen, v. Collagen.
Prostaglandin E; über die Wirkung von Prostaglandin E auf den Ca-Haushalt isolierter Meerschweinchenherzen, *B* 556.
Prostate, v. Vitamin A.
Protein biosynthesis, v. Chloramphenicol.
Protein fractions, v. Antibody productions.
Protein tannic acid complex, v. Tween 80.
Proteingehalt, v. *Lemna minor*.
Proteine; densitometrische Bestimmung von Proteinen in kleinen Volumen, *B* 981.
Protéines musculaires; étude biochimique des poissons: 1. variations semestrielles de la teneur en eau et en protéines du tissu musculaire de la truite arc-en-ciel (*Salmo gairdnerii* Rich), *B* 430.
–; étude biochimique des poissons: 2. variations semestrielles de la teneur en glycogène, en lipides totaux et en minéraux du tissu musculaire de la truite arc-en-ciel (*Salmo gairdnerii* Rich), *B* 431.
Proteins; separation of serum proteins in different amphibian species by polyacrylamide gel electrophoresis, *B* 483.
Proteinsynthese, v. Halothan.
Protoporphyrin und Hämin in Kulturfiltraten von *Achromobacter metalcaligenes*, *B* 31.
Pseudomonas aeruginosa, v. EDTA.
Pseudomonas fluorescens; sensibilité aux UV et photorestauration des types R et S *Pseudomonas fluorescens*, *B* 875.

Pteridins, v. Eye pigments.
Pulmonary vessels, v. Monoaminergic innervation.
Pupil servomechanism; oscillations in the pigeon's pupil servomechanism in relation to illumination, *B* 154.
Puromycin, v. EMC-Virus.
Pyridine nucleotide; the oxidation reduction state of pyridine nucleotide in isolated frog gastric mucosa, *B* 715.
Pyridinolcarbamate; influence of pyridinolcarbamate on hepatic cholesterogenesis in rats, *B* 1000.
5-(3-Pyridyl)tetrazole, a potent and long-acting lipolysis inhibitor, *B* 88.
Pyridoxal phosphate; metabolism of pyridoxal phosphate in the liver of hypo- and hyperthyroid rats, *B* 719.
–, v. Temperature.
Pyrimidinderivat, v. Stabilitätskonstanten.

Quinone pigments; the distribution of quinine pigments in *echinoderms*, *B* 624.

Rabbit serum, v. Lytic activity.
Rabies virus, v. Antigens.
Radioprotective effect, v. Hydrocortison.
Radioprotective effects, v. Dimethyl sulfoxide.
Radiosensitization; on the mechanism of radiosensitization by iodine compounds at the molecular level, *B* 630.
Radiostrontium-Ausscheidung im Kot junger Ratten nach calciumreicher Ernährung, *B* 146.
Rana esculenta, v. Farbwechsel.
Rana pipiens, v. DNA.
Ratoon-stunting disease; early detection of infection of sugarcane by ratoon-stunting disease (RSD), *B* 341.
X-Ray analysis, v. Rifamycin Y.
X-Ray cinematography; an apparatus for direct X-ray cinematography exemplified by analysis of some respiratory movements in *Gasterosteus aculeatus*, *B* 74.
X-Ray diffraction line profile; contribution to the method for approximation of X-ray diffraction line profile, *B* 352.
X-Ray diffraction methods, v. Polycrystal lattice parameters.
β-Ray irradiation; the participation of kinins in the pathogenesis of early disturbances in the skin capillary permeability in local β-ray irradiation, *B* 555.
X-Rays, v. Olfactory bulbs.
Red blood cells, v. Endotoxin, bacterial.
Red cell acid phosphatase, v. Phosphatase.
Red cells, v. Microcytosis.
Regeneration of feline dorsal roots, *B* 125.
Regeneration of the testes in the clawed toad (*Discoglossus pictus* Orth) after complete surgical removal, *B* 218.
Regeneration, v. Axolotl.
–, v. Leucine H^3.
Regression, v. Mesonephros.
Régulation osmotique et vagotomie chez la tanche: essai d'appréciation par la mesure de l'hématocrite, *B* 731.
Reinnervation, v. Denervation.
Renal disease, v. Amyloidosis.
Renal response, v. Angiotensin.
Renal vessels, v. Kidney.
Reproductive ducts, v. Adrenergic innervation.
Reptiles, v. Tyrosinase activity.
Reserpine; action of reserpine and imipramine on intracellular storage of 5-hydroxytryptamine in blood platelets, *B* 289.
–; the effect of reserpine upon gastrointestinal serotonin in the sprague dawley rat, *B* 826.
–, v. EEG-activity.
–, v. Serotonin.
Respiration; aerial and aquatic respiration of certain trochids, *B* 52.
–; experiments on the respiration of the trigger fish (*Balistes capriscus*), *B* 1077.
Respiration, v. Salinité.
Respiration rates and peroxydase activity in virus infected *Phaseolus vulgaris*, *B* 676.
Respiratory neurons, v. Etonitazene.
Reticular formation, v. EEG-activity.
Reticuloendothelial system, v. β-D-glucuronidase.
Retinal rod; the lipid composition of frog retinal rod outer segments, *B* 993.
Retinale Impulsaktivität, v. Desipramin.
Retinalfalten im Auge von Wassersäugetieren, *B* 54.
β-Rezeptoren-Blocker, v. o-Allyloxy-phenoxy-propanolamine.
Rf-values; a template for the rapid measurement of Rf-values in thin layer chromatography, *B* 157.
Rhesus monkeys, v. Erythropoietin.
Riboflavin; effect of riboflavin deficiency on in vivo incorporation of C^{14} from labelled alanine into liver glycog *B* 633.
Riboflavin in the blood serum, the skin and the venom some snakes of Burma, *B* 722.
Ribonuclease activity in leucocytes of hyperimmunized r bits, *B* 185.
Ribonuclease inhibitor; purification of ribonuclease inhibi from pig cerebral cortex, *B* 525.
Ribonucleic acid, v. Lymphocytes.
Ribonucleic acid polymerase, v. Ammonium.
Ribose phosphate isomerase, v. Lens, bovine.
Riesenfasern, v. Erregungsübertragung.
Rifamycin Y; the X-ray analysis of the structure of ri mycin Y, *B* 508.
Rifamycin Y und seine Umwandlungsprodukte, *B* 505.
Rifamycins; biogenesis of rifamycins, the conversion of ri mycin B into rifamycin Y, *B* 899.
Rind, v. ATP-Spaltung.
RNA; on the prevention of loss of RNA into lipid solven *B* 695.
RNA, v. DNA.
RNA containing structures; modifications of RNA containi structures of dorsal bulbocavernosus muscle of rat af castration and testosterone administration, *B* 134.
RNA immuno-carrier, v. Syphilitic rabbits.
s-RNA methylase activity of embryonic liver, *B* 806.
RNA synthesis; impairments of RNA synthesis in ehrli ascites tumour by luteoskyrin, a hepatotoxic pigment *Pencillium islandicum* Sopp, *B* 1001.
RNS; über Struktur und Aktivität der den H_2O_2-Zerfall kat lysierenden Cu^2-Complexe. – IV. Differenzierung von na ver RNS und nativer DNS bzw. denaturierter DNS a Grund der katalytischen Eigenschaften, *B* 170.
RNS-Gehalt, v. *Lemna minor*.
Robinia pseudacacia, v. Uterine smooth muscle.
Roots; chemical examination of the roots of *Cissampel pareira* Linn. part V. Structure and stereochemistry hayatidin, *B* 242.

Saccharin avoidance, v. DMSO.
Salinité; variations de salinité chez la tanche (*Tinca tinca* L effet de la vagotomie sur intensité respiratoire et la tene en eau et cations (Na^+ et K^+) du tissu hépatique, *B* 264
Salivary glands, v. Adrenergic nerves.
Salivary gland chromosomes, v. Chromosomes.
Salmo gairdnerii Rich, v. Protéines musculaire.
Samenbläschen; über einen die Samenbläschen hemmend Stoff aus Luzerne, *B* 285.
Sarcosine dehydrogenase activity in liver mitochondria infant and adult rats, *B* 632.
Schistocerca gregaria Forsk, v. Larval epiderm.
Schwefeldichlorid, v. Cyclooctatetraen.
Sciurus, v. Chromosomes.
Secretion; effect of secretion on bicarbonate secretion in flu perfusing the rat ileum, *B* 337.
Seeds; chemical investigation of the seeds of *Albizzia proce* Benth, *B* 182.
Segontin; differential amine depletion from cardiac adrenerg nerves by segontin, *B* 203.
Selenite, v. Sublimate intoxication.
Selenium; effect of selenium and type of diet on the patte of food and water intake in the rat, *B* 930.
Seminal vesicle, v. Castration.
Sepiapterin deaminase; occurrence of sepiapterin deamina in the silkworm, *Bombyx mori*, *B* 116.
Sera, human; a simple method of purifying human sera f the assay of long acting thyroid stimulator, *B* 404.
Serotonin; variation in intestinal serotonin levels, and t effect of reserpine in sprague-dawley rats from differe sources, *B* 28.
–, v. Lidoflazine.
–, v. Reserpine.
Serotonin levels; bowel serotonin levels in the fasted a non-fasted sprague dawley rat, *B* 67.
Serotonin levels, intestinal; the influence of chlorothiazide a tolbutamide upon intestinal serotonin levels in the sprag dawley rat, *B* 1049.
Serum, v. Aminotransferase.
–, v. Amylolytic enzymes.
–, v. Carbohydrate metabolism.
–, v. Chemotaxis.
Serum albumin; polarographic catalytic waves of ultraviol irradiated and urea denatured bovine serum albumin, *B* 8

um desoxyribose compounds in experimental myocardial nfarction, *B* 642.
um proteins; the assessment of the rate of digestion of serum proteins in mosquito by gel diffusion and immuno-electrophoresis, *B* 378.
; discrimination of genetic sex in embryos of d-rR strain of the medaka (*Oryzias latipes*), *B* 569.
balance; the re-establishment of sex balance in *Ophryocha puerilis* through interactions between individuals from arrhenogenous and thelygenous lines, *B* 448.
-chromosome mechanism; on the multiple sex-chromosome mechanism in *Trapezonotus arenarius* L. (Heteroptera, Lygaeidae), *B* 270.
hormones and concentration of noradrenalin and dopamine in the anterior hypothalamus of castrated rats, *B* 665.
reversal of *Cobitis taenia* L., *B* 446.
chromatinbestimmung aus der Haarwurzel, *B* 319.
ep, v. Fascioliasis.
vering; inhibition of shivering obtained by peripheral stimulation, *B* 638.
vering in intact and spinal rabbits during spinal cord cooling, *B* 385.
atrial node cells, v. Histamine.
letal muscle; the substrate supply of the human skeletal muscle at rest, during and after work, *B* 974.
. Adipose tissue.
. Hypercapnia.
n, v. Riboflavin.
. Photosensitizing activity.
. Tyrosinase.
n capillary permeability, v. β-Ray irradiation.
n, human; morphological classification of the basal melanocytes of the human skin, *B* 259.
ep; difference in electrical activity during wakefulness and the phase of sleep with muscular twitches as recorded from the cortex of the marsupial *Didelphis azarae* (south American Opossum), *B* 216.
ep cycle; influence of long-lasting stimulation of the caudate nuclei on sleep cycle in rats, *B* 130.
ep, paradoxical; the influence of deprivation of paradoxical sleep on glycogen content in various brain structures of the cat, *B* 200.
ep-waking cycle, v. Split brain stem preparation.
oth muscle, v. Adrenergic fibres.
. Lidoflazine.
ke venom, v. Phospholipase A.
. Riboflavin.
ke venoms; hydrolysis of human leucocyte phospholipids by snake venoms, *B* 333.
ibrinolytic protease in snake venoms, *B* 999.
he presence of a L-leucyl-β-napthylamide hydrolyzing enzyme in snake venoms, *B* 439.
, v. Pinealectomy.
ium dodecyl sulfate, v. Urease.
ium intake in goldfish, *B* 13.
moisture; physiological significance of soil moisture beyond the permanent wilting percentage, *B* 862.
num lycopersicum esc, v. Light.
midine, v. Wheat growth.
mine; on the antimutagenic effect of spermine.
. Wheat growth.
miogenesis, v. Golden hamsters.
en, v. Mast cells.
en cells, v. Endotoxin, bacterial.
t brain stem preparation; chronic split brain stem preparation effect on the sleep-waking cycle, *B* 126.
ntaneous activity of rats on diets varied in protein, arbohydrate and fat content, *B* 395.
ading depression in rats, v. Capsula interna fibres.
++; time course of the distribution of in vivo administered Sr^{++} in rat liver subcellular fractions, *B* 1017.
ilitätskonstanten; über die Stabilitätskonstanten von yrimidinderivaten mit Kupfer, *B* 599.
kegehalt, v. *Lemna minor*.
ning; a rapid method for staining thin sections of vestopal -embedded tissue for light microscopy, *B* 792.
ning, selective; a method for selective staining of damaged east cells, *B* 405.
ning technique; a simple staining technique for electron icroscopy with lead uranyl acetate, *B* 316.
hylococcus aureus; the leakage of intracellular constituents from heated suspensions of *Staphylococcus aureus*, 878.
Star, v. Gonadenentwicklung.
Steady-state, v. Active transport.
Steroid hormones; identification of steroid hormones from *Lacerta sicula* testes, *B* 73.
Steroid hormones in the testicular tissue of *Gallus domesticus*, *B* 594.
C_{19}-Steroid sulphates, v. Aromatization.
Steroid treatment, v. Dehydrogenases, ovarian.
C^{21} Steroids; metabolism of C^{21} steroids by incubated adrenals of ACTH treated rats, *B* 534.
Stereotaxic localization, v. Amygdaloid nuclei.
Stoffwechseluntersuchungen, kinetische; die Probeentnahme in kinetischen Stoffwechseluntersuchungen mit Wasserlinsen *Lemna minor* L. (*Lemnaceen*), *B* 235.
Stomach muscle, v. Muscle, frog.
Storage, v. Egg white of chicken.
Strahleneinwirkung, v. Vaginalabstrich.
Stratum corneum, v. Dimethyl sulfoxide.
Stress, v. Cardiac hypertrophy.
–, v. Cardiac necrosis.
Strontium hydroxyapatite; infrared spectrum of strontium hydroxyapatite, *B* 697.
Structure-activity relation; topochemical approach to the structure-activity relation. Retroenantio-gly-5,10-Gramicidin S, *B* 326.
Structure-activity relationships; a correlation between constants used in structure-activity relationships, *B* 125.
Sturnus vulgaris, v. Gonadenentwicklung.
Sublimate intoxication; the protective effect of small amounts of selenite in sublimate intoxication, *B* 142.
Submaxillary gland; action of new β-blocking agents on the submaxillary gland of the rat, *B* 734.
–, v. Cholin acetylase.
–, v. Denervation.
Substance Q: a smooth muscle contracting substance liberated from human plasma lipids by the action of heat, *B* 93.
Substrate supply, v. Skeletal muscle.
Substratoxydation, v. Ascites Tumorzellen.
Succinic dehydrogenase; a quantitative histochemical study of succinic dehydrogenase in the kidney and liver of rats subjected to nephrectomy and injected with egg-white, *B* 751.
–; histochemical demonstration of succinic dehydrogenase in cryostat sections of fresh frozen plant tissues, *B* 235.
Succinodehydrase-Aktivität; die Veränderungen der Succinodehydrase-Aktivität in Detroit-6(VA) Zellen, infolge der Infektion mit dem *Hepatitis-infectiosa*-Virus, *B* 84.
Succinylcholine; effects of succinylcholine on γ-fibres, *B* 327.
Sucrose administration oral, v. Glucose release.
Sugar, v. Chlorophyll synthesis.
Sugarcane, v. Ratoon-stunting disease.
Sulfamerazine, v. Argentaffin cells.
Sulphamethazine, v. Tryptophan metabolites.
Swimming activity; a new method for recording the swimming activity in flatfishes, *B* 574.
Sympathetic effects, v. Diphenylpropylamine derivative.
Sympathetic ganglia, frog. v. Adrenergic amines.
Sympathetic nerve terminals, v. Empty vesicles.
Sympathetic regulation; mechanisms of sympathetic regulation of arterial smooth muscle, *B* 639.
Synapses, retinal; new-forming retinal synapses in vitro, *B* 199.
Syphilitic rabbits; induction of anti-*Treponema pallidum* antibodies in normal rabbits by RNA immunocarrier extracted from serum of syphilitic rabbits, *B* 207.

Tabakrauch; zur Frage des Vorkommens von N-Nitroso-Verbindungen im Tabakrauch, *B* 400.
Tadpoles; indigenous microbial flora and the large intestine in tadpoles, *B* 950.
Taka-amylase; inhibition of riboflavin-sensitized photoinactivation of taka-amylase by some inhibitors, *B* 25.
Taka-amylase A; photo- and heat-inactivation of taka-amylase A and substrate effects, *B* 96.
Talitrus saltator, v. Orientation.
Tangential wall stress, v. Heart.
Telopeptides, v. DNA.
Temperature; effect of temperature on the spectral properties of glutamic-aspartic transaminase and pyridoxal phosphate, *B* 708.
Teratogenesis; thymidine teratogenesis and mutagnesis in *Drosophila melanogaster*, *B* 859.
Teratogenic effects, v. Leucine.

Teratogenic response; differences in teratogenic responses and in capacity to repair in embryos of two inbred strains of mice, *B* 449.
Termite; étude radiographique du transit intestinal chez un termite supérieur, *B* 820.
Test flash interaction in the electroretinographic response of the compound eye, *B* 542.
Testes, v. Regeneration.
Testicular activity, v. Ascorbic acid.
Testicular damage, v. Fertility.
Testis, v. Gonadotrophin.
Testosterone; v. Castration.
–, v. Micturition behaviour.
Testosterone administration, v. RNA containing structures.
Testosteronsulfat; die Isolierung von 17β-Hydroxyandrost-4-en-3-on-17-sulfat (Testosteronsulfat) aus männlichem Urin, *B* 299.
Test-tube fertilization of ovules in *Melandrium album* Mill with pollen grains of several species of the *Caryophyllaceae* family, *B* 775.
Tetanic contractions, v. Cardiac muscle.
Tetrahymena pyriformis, v. Contrast media.
Tetraphenylporphinesulfonate in tumors, v. Tumors.
Tetrazolium; inhibition par les sels de tetrazolium de l'activité monoamine-oxydasique d'une suspension mitochondrial de cerveau de mouton, *B* 262.
Thalamus; architectonical and volumetrical investigations on the thalamus of the cetacea in comparison with the human brain, *B* 973.
Thermal stress; growth inhibition in mammalian cells exposed to thermal stress, *B* 563.
Thiamine; phosphorylation and uphill transport of thiamine in vitro, *B* 175.
Thiols; reactions of captan and folpet with thiols, *B* 81.
Thrombolysis, v. Polysorbate 80.
Thymectomy; effect of neonatal thymectomy on tumour induction by adenovirus type 12 in hamsters, *B* 580.
–, v. Tryptophan pyrrolase.
Thymectomy, neonatal; additional studies on the effects of neonatal thymectomy and lactate dehydrogenase virus infection in mice, *B* 681.
Thymidine; incorporation of tritiated thymidine by teleost epidermal cells, *B* 357.
–, v. Atherosclerosis.
–, v. Proliferations-Stoffwechsel.
Thymus, peripheral lymphoid tissues and immunological responsiveness of the pituitary dwarf mouse, *B* 282.
Thyroid, v. Iodotyrosines.
Thyroid application, v. 7α-Hydroxylation.
Thyroid stimulator, v. Sera, human.
Thyrotropin release; potassium-induced stimulation of thyrotropin release in vitro. Requirement for presence of calcium and inhibition by thyroxine, *B* 855.
Thyroxine, v. Thyrotropin release.
Tinca tinca, v. Salinité.
Tissue toxicity, v. Contrast media.
TNBT-Formazanablagerungen; nichtenzymatisch bedingte TNBT-Formazanablagerungen in Gewebsstrukturen, *B* 390.
Tobacco, v. Cholesteryl esters.
Tomatoes; ripening tomatoes: $C^{14}O_2$ uptake by green tomato fruit, *B* 779.
Transit, intestinal, v. Termite.
Transplantation of nuclei and mitochondria of *Physarum polycephalum* by plasmodial coalescence, *B* 713.
Transplantationen, homoplastische; homoplastische Transplantationen embryonaler Zellen in differenzierte Gewebe, *B* 210.
Transplantations d'ébauches gonadiques de souris dans la cavité cœlomique de l'embryon de poulet, *B* 225.
Trapezonotus arenarius L., v. Sex-chromosome mechanism.
Tree provenance, v. Chlorophyll.
Trehalose in the flight muscle of the house fly *Musca domestica* L. in relation tomage, *B* 636.
Treponema pallidum antibodies, v. Syphilitic rabbits.
TRF, v. Calcium ions.
Trichoderma viride, v. Antibacterial agent.
Trifluoroacetyl as a protecting group for amino acid hydrazides, *B* 265.
Trigeminal fibres; primary afferent depolarization of trigeminal fibres induced by stimulation of brain stem and peripheral nerves, *B* 398.
Tritium; non-incorporation de tritium dans la dihydroménaquinone-9 de *Mycobacterium phlei* au cours des oxydations phosphorylantes, *B* 360.
Trochids, v. Respiration.
Truite, v. Polymorphisme.
Trypaflavine, v. *Bacterium paracoli* 5099.
Trypanblau, v. Teratogenic response.
Tryptophan metabolites; the acetylation of tryptophan me bolites by rapid and slow acetylators of sulphamethazi *B* 959.
Tryptophan production by mutant strains of *Escherichia* K 12, *B* 724.
Tryptophan pyrrolase; induction of tryptophan pyrrolase rats after early injections of tryptophan or neona thymectomy, *B* 436.
Tryptophan pyrrolase activity of human liver, *B* 617.
Tryptophane, v. Collagen.
Tryptophane metabolism; regulation of tryptophan me bolism in the parasitic wasp, *Habrobracon juglandis*, *B* 10
Tryptophanhydroxylase im corpus pineale beim Mensch *B* 711.
TSH-content; influence of photoperiods on the seaso fluctuations of TSH-content of the pituiary in a freshwa catfish *Mystus vittatus*, *B* 1016.
TSH-release, v. Calcium ions.
TSH-releasing factor, v. Hypothalamic hormones.
Tumor induction, v. Thymectomy.
Tumore di Yoshida; transmissione del tumore di Yosh con estratti acellulari del medesimo, *B* 662.
Tumore, v. Kinetin.
Tumors; metabolic studies on the accumulation of tetraphen porphinesulfonate in tumors, *B* 949.
Tumour formation in platyfish-swordtail hybrids as a probl of gene regulation, *B* 1.
Tumour glucose-6-phosphate dehydrogenase inhibition actinomycin, *B* 920.
Tumours; effect of some synthetic α-N-alkyl glutamine deri tives on transplantable mouse tumours, *B* 1053.
Tumours, human, transplantable, v. Ibenzmethyzin hyd chloride.
Tween 80; effect of tween 80 on protein-tannic acid compl *B* 1015.
–, v. Polysorbate 80.
Tyramin; Unterschiede zwischen Tyramin und Dimeth phenylpiperazin in der Ca^{++}-Abhängigkeit und im z lichen Verlauf der Noradrenalin-Freisetzung am isolier Kaninchenherzen, *B* 933.
Tyrosinase; utilization of D-tyrosine by vertebrate s tyrosinase, *B* 997.
Tyrosinase activity; integumental tyrosinase activity in r tiles, *B* 917.
D-Tyrosine, v. Tyrosinase.
Tyrosine diet, v. Collagen proteins.
Tyrosine hydroxylase, v. DOPA.

Uridinediphosphoglucose: glycogen α-4-glucosyltransferase human myometrium, *B* 287.
Urin, v. Testosteronsulfat.
–, v. Interferon.
Urin-pH; der Einfluss des Urin-pH auf die Aktivität v Urinenzymen, *B* 342.
Urine; age-dependent changes of acid mucopolysacchar excretion patterns in human urine, *B* 908.
Urine concentrating process; a possible role of acid mu polysaccharides in the urine concentrating process, *B* 1
Urinenzyme, v. Urin-pH.
Urease. VIII. its interaction with sodium dodecyl sulfa *B* 443.
Urethan, v. EEG.
Urethane; the effect of urethane on some electrical proper of molluscan giant neurons, *B* 643.
Uterine smooth muscle; effects of water soluble extract *Robinia pseudoacacia* leaves on uterine smooth mus *B* 637.
Uterine work; mechanical prerequisites for effective ute work, *B* 371.
UV-light irradiation, v. Contractile vacuole.

Vaginalabstrich; zellmorphologische Veränderungen im Va nalabstrich nach Strahleneinwirkung, *B* 879.
Vagotomie, v. Régulation osmotique.
–, v. Salinité.
Vas deferens, v. Denervation hypogastric.
–, v. Noradrenaline.
Vascular permeability; continuous quantitative recording changes in vascular permeability, *B* 884.

ular tone; blood-borne factors affecting vascular tone, 486.
pressin, v. Antidiuretic action.
ricular injections; eating and drinking induced by cerebral-ntricular injections in rats with lesions in the lateral ypothalamus, *B* 1033.
ilbung, herbstliche, v. Blattlipide.
opal W-embedded tissue, v. Staining.
a faba; meiotic consequences of a combined treatment fast eurons-FUDR in *Vicia faba*, *B* 582.
a faba equina, v. Hydrocortison.
r neurotoxin; antibody against purified viper neurotoxin, 566.
genic lines of RSV-transformed rat cells, *B* 754.
s, v. D_2O.
-Virus, v. Polyribosome patterns.
osity, intrinsic; an empirical relationship between intrinsic iscosity and frictional ratio, *B* 815.
min A; uptake and autoradiographic demonstration of itamin A and/or its metabolic derivatives in organ cul-ures of rat prostate, *B* 353.
min B_{12}, v. (^{3}H) Formate.
min C, v. m-Xylohydroquinone.
min K, v. Actinomycin D.
llogenesi in *Arbacia lixula* e *Sphaerechinus granularis* Echin.), *B* 433.
tile reagents; a micro-technique for performing reactions ith volatile reagents, *B* 318.

hstum, v. Progesteron.
efulness, v. Sleep.
ing action, v. Histamine.
sersäugetiere, v. Retinalfalten.
er intake in relation to blood potassium types in desert heep, *B* 645.
at, v. Gluten synthesis.
at growth; spermine and spermidine distribution during heat growth, *B* 139.

Wound healing; altered wound healing in X-irradiated rats, the effect of bone marrow shielding, *B* 1064.
Wounds; enhanced healing of skin wounds in dogs with systemically and locally administered drugs, *B* 55.

Xanthine dehydrogenase, v. Colchicine.
Xanthine dehydrogenase 4-hydroxypyrazolo (3,4 d) pyrimidine, v. Eye pigments.
Xenopus laevis, v. Chromosomen.
X-irradiation; protective effect of magnesium pemoline against lethal doses of X-irradiation, *B* 1058.
m-Xylohydroquinone; stabilisation of aqueous solutions of the insect chemosterilant m-xylohydroquinone by vitamin *C*, *B* 679.

Yeast cells, v. Metal transport.
–, v. Staining, selective.

Zimmermann reaction of 3-, 6- and 20-oxosteroids, *B* 288.
Zinco; dati preliminari sulla presenza di zinco nel veleno cutaneo di anfibi, *B* 293.
Zink, v. Insulin.
Zinkaufnahme; Spezifität der Zinkaufnahme durch *Chlorella*, *B* 18.
Zugverhalten, v. Gonadenentwicklung.
Zugvögel; Wirkung des Mondlichtes auf die Nachtaktivität von Zugvögeln. – Lotsenversuch an Rotkehlchen (*Erythacus rubecula*) und Gartenrotschwänzen (*Phoenicurus phoenicurus*), *B* 227.
Zunge, v. Geschmacksknospe.
Zwerchfell; gereizte und ungereizte Rattenzwerchfelle in einer Kaliumtyrodelösung von 137 mM, *B* 931.
Zwerchfellstreifen; Untersuchungen über das Verhalten des denervierten Rattenzwerchfellstreifens in verschiedenen konzentrierten (Ca^{++})- und K^+-Lösungen, *B* 937.
Zwischenhirn; über die indirekten Kerneinschlüsse in Ganglienzellen des menschlichen Zwischenhirns, *B* 646.
